

Command Button

FEATURES

- Instant performer control with a single programmable button
- Configurable for operation as either a latch or momentary switch
- Private talkback access for direct communication with engineers and crew
- On-demand mute for coughs, off-mic moments, or privacy
- Compatible with Spectera SEK, SK 9000, and SK 6000 bodypacks
- Compact, wearable design with integrated clip for easy placement
- Simple connection via 3-pin socket and plug with 160 cm cable

DELIVERY INCLUDES

- Command Button

The Sennheiser Command Button gives performers instant, customizable control from the stage.

Compatible with Spectera SEK, SK 9000, and SK 6000 bodypacks, the Command Button can be configured for functions such as push-to-talk, push-to-mute, and other programmable control functions depending on the system.

Its compact, wearable design with integrated clip allows easy placement on the performer's clothing.
