

Optimized for Speech

Dedicated headphones complete Sennheiser's conference and visitor guidance solutions

Wedemark, 24 June 2013 – Sennheiser has released new headphones specially created for conference and visitor guidance systems. The lightweight HP 02, NP 02 and EP 01 headphones provide the perfect complement to the audio specialist's existing solutions for the market, and have been unveiled for the first time at InfoComm in Orlando, USA. They feature optimum speech intelligibility and reliability as well as high hygiene standards.

Clear and intelligible sound is essential for successful communication, whether in a meeting, at a governmental summit or during a factory tour. The Sennheiser conference and visitor guidance solutions help customers get their message across – even in noisy environments. "Being optimized for speech, the flexible HP 02, NP 02 and EP 01 headphones perfectly round off our conference and visitor guidance portfolio," explained Jens Werner, Portfolio Manager at Sennheiser Integrated Systems.

Comfortable on-ear headphones: HP 02 and NP 02

The lightweight HP 02 and NP 02 on-ear headphones ensure high listening and wearing comfort while delivering optimal speech intelligibility. Features include an

adjustable headband on the robust HP 02, while NP 02 has a neckband that accommodates additional headgear – vital to accommodate the wide range of potential usage scenarios. The easy to change ear pads of both headphones meet high hygiene standards. In addition, the HP 02 is equipped with rotatable ear cups for efficient storage.

Single and dual-sided in-ear phones: EP 01

The extremely lightweight EP 01 in-ear phones are available in single and dual-sided designs. The dual-sided stereo model delivers excellent speech intelligibility while the single-sided mono version additionally allows an understanding of external sounds. Both in-ear phones feature changeable foam ear pads for optimum hygiene.

All headphones come in two versions: Optionally available with a straight connector (3.5 mm, stereo) and 100 cm cable length or with a right-angle connector (3.5 mm, stereo) and 140 cm cable length. They weigh between 50 and 70 gram.

The headphones are available for sale from the end of July 2013.

The Sennheiser Group, with its headquarters in Wedemark near Hanover, Germany, is one of the world's leading manufacturers of microphones, headphones and wireless transmission systems. In 2011 the family company, which was founded in 1945, achieved a turnover of around 531 million euros. Sennheiser employs more than 2,100 people worldwide, and has manufacturing plants in Germany, Ireland and the USA. The company is represented worldwide by subsidiaries in France, Great Britain, Belgium, the Netherlands, Switzerland and Liechtenstein, Germany, Denmark (Nordic), Russia, Hong Kong, India, Singapore, Japan, China, Canada, Mexico and the USA, as well as by long-term trading partners in many other countries. Also part of the Sennheiser Group are Georg Neumann GmbH, Berlin (studio microphones and monitor loudspeakers), and the joint venture Sennheiser Communications A/S (headsets for PCs, offices and call centres).
