

Monitoring update for Digital 9000 wireless microphone system

Wedemark/Amsterdam, 13 September 2013 – A new firmware update (2.3.8) will provide Sennheiser's top-of-the-range Digital 9000 wireless system with an extended monitoring function. The new software enables a sound engineer to monitor the receiving channels of up to four daisy-chained EM 9046 8-channel receivers via just one monitoring output.

Kevin Jungk, portfolio manager for wireless microphones at Sennheiser: „The new function is ideal for larger Digital 9000 set-ups which can be found at major broadcast and live audio events and in theatres. The new feature makes monitoring faster and more convenient, which is particularly helpful in critical audio applications.“

The free 2.3.8 firmware update for Digital 9000 will be made available from the end of October at <http://en-de.sennheiser.com/service-support/services/software-downloads>.

Visit Sennheiser at the IBC in Hall 8, Stand D 50.

The Sennheiser Group, with its headquarters in Wedemark near Hanover, Germany, is one of the world's leading manufacturers of microphones, headphones and wireless transmission systems. In 2012 the family company, which was founded in 1945, achieved a turnover of around 584 million euros. Sennheiser employs more than 2,300 people worldwide, and has manufacturing plants in Germany, Ireland and the USA. The company is represented worldwide by subsidiaries in France, Great Britain, Belgium, the Netherlands, Switzerland and Liechtenstein, Germany, Denmark (Nordic), Russia, Hong Kong, India, Singapore, Japan, China, Australia and New Zealand, Canada, Mexico and the USA, as well as by long-term trading partners in many other countries. Also part of the Sennheiser Group are Georg Neumann GmbH, Berlin (studio microphones and monitor loudspeakers), and the joint venture Sennheiser Communications A/S (headsets for PCs, offices and call centres).
