

Fine audio quality and smart, durable design

Sennheiser's new HD 400 series headphones are the perfect companions for enjoyable listening experiences on the move or at home

Wedemark/Berlin, 3 September 2015 – Audio specialist Sennheiser launches the next generation of its HD 400 series of over-ear headphones at IFA 2015. Combining fine audio quality with contemporary style and robust design, the range includes the closed-back models HD 451, HD 461 and HD 471. The headphones keep the listener isolated from ambient noise, while lightweight and durable designs ensure the freedom to enjoy music anywhere.

"The HD 400 range is the quintessential choice for anyone wishing to step up to a great audio experience," said Ivan Kuan, Head of Portfolio Management, Essentials, at Sennheiser. "The new headphones build on the success of our popular HD 400 range with fresh designs. They offer Sennheiser's characteristically uncompromised blend of audio excellence, reliability, and contemporary looks."

Powered by Sennheiser's proprietary neodymium magnets, all three models deliver excellent stereo sound, while catering to different sound preferences.

The HD 451 and HD 461 models feature powerful bass, whereas the HD 471 offers a more balanced, lifelike sound experience.

The new HD 400 series headphones are designed to be the perfect companions to mobile devices and for enjoying music on the go, with closed-back, over-ear designs which keep the listener comfortably isolated from external noise and prevent disturbance of others. Convenience and portability of the range are ensured by strong yet lightweight designs, well-thought ergonomics and tangle-free, single-sided cables, while the soft leatherette ear pads of the HD 461 and HD 471 offer greater comfort even for long periods of use.

The HD 461 and HD 471 feature detachable cables with inline remotes and microphones that make taking calls and controlling music playback on a smart device effortless. These models are available in dedicated versions for Android and Apple iOS devices. Reflecting its added appeal to the committed listener, the range-topping HD 471 also includes a 3m cable, a gold-plated plug and a 6.3mm stereo adapter to optimise connectivity with home Hi-Fi equipment. This model also comes supplied with a carry pouch for added protection and convenient storage on the go.

About Sennheiser

Audio specialist Sennheiser is one of the world's leading manufacturers of headphones, microphones and wireless transmission systems. Based in Wedemark near Hanover, Germany, Sennheiser operates its own production facilities in Germany, Ireland and the USA and is active in more than 50 countries.
