

Comprehensive, integrated, Conferencing from Sennheiser TeamConnect

Amsterdam/Wedemark, February 9, 2016 – Sennheiser's TeamConnect is an end-to-end, professional-grade conferencing solution for medium to large conference rooms. TeamConnect can be integrated into any infrastructure or conference room to deliver leading-edge connectivity options for "bring your own device" IT environments, support for all leading unified communication solutions and brilliant sound quality.

Sennheiser TeamConnect is a complete audio solution for businesses. Consisting of the Central Unit CU1 – which offers both Ethernet and WiFi connectivity options, SpeechLine microphones and active loudspeakers, TeamConnect has everything needed to cater for medium to large conference rooms.

"TeamConnect is a classic, reliable audio solution, which is designed to be integrated into any infrastructure or room. It can be used with landline or Unified Communication clients, and either permanently installed or set up for flexible use," said Jens Werner, Portfolio Manager Sennheiser. "As well as being easily linked to networks, it is also very easy to operate, both by IT and for end users, with powerful fine-tuning software to ensure effective installation and simple app- and browser-based tools for controlling conferences on a user's own device."

"Bring-your-own-device" conferences can be easily set up with a smartphone, notebook or tablet. An iOS app offers touchscreen control of web and audio conferences on iPad and iPhone, while a browser-based web app provides a similarly easy-to-use interface on other devices. Connections to ongoing conferences can be established by plug-and-play.

In addition to excellent connectivity options, TeamConnect offers comprehensive support for a wide range of Unified Communications platforms, including Skype for business, OpenSpace, GoToMeeting, IBM, Cisco, and Avaya.

A complete system, with Sennheiser quality

“TeamConnect represents a complete system approach to conferencing. All components are designed to meet the same high quality standards of Sennheiser and work together seamlessly” said Jens Werner, Portfolio Manager at Sennheiser.

“This not only reduces the burden on IT staff by making it easier for end users to operate with minimal support, but also delivers the significant cost savings, better integration and performance that can only come from an integrated system.”

The system comprises up to eight Sennheiser SpeechLine microphones (either table-top or fixed installed) and its SL loudspeakers to drive rich immersive sound from the active SpeechLine speakers that are optimized for speech intelligibility. Different bundle configurations, individually adjusted to spatial conditions and different sized working groups are available.

About Sennheiser

Audio specialist Sennheiser is one of the world's leading manufacturers of headphones, microphones and wireless transmission systems. Based in Wedemark near Hanover, Germany, Sennheiser operates its own production facilities in Germany, Ireland and the USA and is active in more than 50 countries. With 18 sales subsidiaries and long-established trading partners, the company supplies innovative products and cutting-edge audio solutions that are optimally tailored to its customers' needs. Sennheiser is a family-owned company that was founded in 1945 and which today has 2,700 employees around the world that share a passion for audio technology. Since 2013, Sennheiser has been managed by Daniel Sennheiser and Dr. Andreas Sennheiser, the third generation of the family to run the company. In 2014, the Sennheiser Group had sales totalling €635 million.
