

## SENNHEISER ANNOUNCES INTEGRATION OF DIGITAL 6000 IN YAMAHA CONSOLES

**Wedemark/Las Vegas, June 6, 2018 – At InfoComm, Yamaha and Sennheiser have announced that the Sennheiser Digital 6000 microphone systems can be seamlessly integrated into Yamaha CL and QL series consoles with the upcoming Sennheiser and Yamaha firmware updates. These updates mean that Sennheiser’s EM 6000 and EM 6000 DANTE wireless receivers can be monitored directly from the consoles, allowing engineers to check parameters such as RF performance, link quality, audio level and battery status directly from the console as well as adjust certain parameters without the need for additional software or screens. This integration is already available for Soundcraft Vi000 consoles.**

“Yamaha has continued to offer new and convenient solutions through close collaboration with various partners,” says Yoshi Tsugawa, General Manager of the Yamaha Pro Audio Division. “This announcement takes that collaboration to an even higher level. Digital mixing consoles are expected to take on a much larger role than simply mixing in today’s sound systems, and the full breadth of the functionality required cannot be handled by one company alone. All-encompassing solutions would not be possible without the support and cooperation of third parties. Feedback from our valued customers is also a vital ingredient. Driven by the needs of our customers, deeper collaboration with our third-party partners will continue to produce world-class solutions into the future.”

“Sennheiser is always keen to collaborate with other manufacturers to allow our systems to interface with their products, making user workflows as smooth and easy as possible,” says Tom Vollmers, Senior Product Manager, Professional Audio at Sennheiser. “Being able to monitor the EM 6000 parameters directly from a mixing console is something our customers have been asking for. We are delighted that both Yamaha and Soundcraft are implementing this integration in selected consoles in their ranges, and we are currently working with other manufacturers to extend this ability to their consoles.”

Visit Sennheiser at InfoComm 2018 in Central Hall, C1660 and North Hall, N1427.

### **About Sennheiser**

Sennheiser is shaping the future of audio – a vision built on more than 70 years of innovation culture, which is deeply rooted within the family-owned company. Founded in 1945, Sennheiser is one of the world’s leading manufacturers of headphones, microphones and

wireless transmission systems. With 20 sales subsidiaries and long-established trading partners, the company is active in more than 50 countries and operates its own production facilities in Germany, Ireland and the USA. Sennheiser has around 2,800 employees around the world that share a passion for audio excellence. Since 2013, Sennheiser has been managed by Daniel Sennheiser and Dr. Andreas Sennheiser, the third generation of the family to run the company. In 2016, the Sennheiser Group had sales totalling €658.4 million.
