PRODUCT INFORMATION

Overview

You can find information about the individual products in the ew 100 G4 series under “ew 100 G4 series products”.

For information about the available accessories, see “Accessories”.

You can find information about the ew 100 G4 series frequency bank system under “The frequency bank system”.

---

Overview
You can also find more information here:

- A variety of **frequency variants** are available from the individual products. You can find more information under “Product variants”.
- You can find **technical specifications** about the individual products under “Specifications”.
- You can find information about **installing** the products under “Installing and starting up ew 100 G4 series devices”.
- You can find information about **operating** the products under “Using ew 100 G4 series devices”.

ew 100 G4 series products
You can find more detailed information about the EM 100 G4 in the following sections:

- **Installation and Startup**: “Installing the EM 100 G4”
- **Operation**: “Using the EM 100 G4”
- **Technical Data**: “EM 100 G4”
SKM 100 G4 handheld transmitter

SKM 100 G4 variant:

SKM 100 G4-S variant:

The SKM 100 G4 handheld transmitter is also available in the SKM 100 G4-S variant with an integrated mute switch.

You can find more detailed information about the SKM 100 G4 in the following sections:

- **Installation and Startup**: “Installing the SKM 100 G4”
- **Operation**: “Using the SKM 100 G4”
- **Technical Data**: “SKM 100 G4”
SK 100 G4 bodypack transmitter

You can find more detailed information about the SK 100 G4 in the following sections:

- **Installation and Startup**: “Installing the SK 100 G4”
- **Operation**: “Using the SK 100 G4”
- **Technical Data**: “SK 100 G4”
Accessories

A variety of accessories are available for the ew 100 G4 series.
Microphones and cables

Microphone modules

We recommend using the following microphone modules with the SKM 100 G4 and SKM 100 G4-S handheld transmitters.

<table>
<thead>
<tr>
<th>Module</th>
<th>Features</th>

### Line/instrument cables

The following cables are available to connect instruments and line sources to the SK 100 G4 bodypack transmitter:

- **Sennheiser CL 2**
  Line cable with XLR-3F plug on lockable 3.5 mm jack plug, article no. 004840

- **Sennheiser Ci 1-N**
  Guitar cable with 6.3 mm jack plug on lockable 3.5 mm jack plug, article no. 005021
Rechargeable battery and charger

BA 2015 rechargeable battery

The BA 2015 rechargeable battery is designed for use with evolution wireless G4 series handheld transmitters, bodypack transmitters and bodypack receivers.

Article no. 009950

L 2015 charger

The BA 2015 rechargeable battery can be charged in the L 2015 charger on its own or inside of the bodypack transmitter/bodypack receiver.

Article no. 009828
LA 2 charging adapter
Charging adapter for L 2015 charger for charging SKM G4 handheld transmitters with installed BA 2015 rechargeable battery.
Article no. 503162
Accessories for rack mounting

**GA 3 rack mount kit**

19" rack adapter for mounting the EM 100 G4, EM 300-500 G4 or SR IEM G4 in a 19" rack.

Article no. 503167

**AM 2 antenna front mounting kit**

Antenna front mounting kit for installing antenna connections on the front of the rack when using the EM 100 G4, EM 300-500 G4 or SR IEM G4 together with the GA 3 rack mounting kit.

Article no. 009912
Antennas and accessories

The following antenna components are available as accessory parts.

Omni-directional antennas

- **A 1031-U**, passive omni-directional antenna, article no. 004645

Directional antennas

- **A 2003 UHF**, passive directional antenna, article no. 003658
- **AD 1800**, passive directional antenna, 1.8 GHz range, article no. 504916

Antenna splitter

- **ASA 214**, active antenna splitter 2×1:4
  - **ASA 214-UHF** variant, 470 – 870 MHz, article no. 508241
  - **ASA 214-1G8** variant, 1785 – 1800 MHz, article no. 508242
  - See “Installing the ASA 214” and “Using the ASA 214”

Antenna amplifiers

- **AB 3700**, broadband antenna amplifier, article no. 502196
- **AB 3**, antenna amplifier, up to 42 MHz bandwidth
  - **AB 3-A** variant, frequency range A, article no. 502567
  - **AB 3-A1** variant, frequency range A1, article no. 507367
  - **AB 3-B** variant, frequency range B, article no. 502568
  - **AB 3-C** variant, frequency range C, article no. 502569
  - **AB 3-D** variant, frequency range D, article no. 502570
  - **AB 3-E** variant, frequency range E, article no. 502571
  - **AB 3-G** variant, frequency range G, article no. 502572
  - **AB 3-GB** variant, frequency range GB, article no. 504680
  - **AB 3-K** variant, frequency range K, article no. 505550
  - **AB 3-1G8** variant, frequency range 1G8, article no. 504915

Antenna cables

- **GZL 1019**, BNC/BNC coaxial cable, antenna cable with 50 Ω characteristic (wave) impedance
  - **GZL 1019-A1** variant, 1 m (3 ft), article no. 002324
  - **GZL 1019-A5** variant, 5 m (16 ft), article no. 002325
  - **GZL 1019-A10** variant, 10 m (32 ft), article no. 002326
Additional accessories

Color labeling set

• **KEN 2**, color labeling set for SKM handheld transmitters, article no. 530195

Microphone clamp

• **MZQ 1**, microphone clamp for SKM handheld transmitters, article no. 076670
The frequency bank system

There are different frequency ranges in the UHF band available for transmission.

The following frequency ranges are available for the ew 100 G4 series:

- A1 range: 470 – 516 MHz
- A range: 516 – 558 MHz
- AS range: 520 – 558 MHz
- G range: 566 – 608 MHz
- GB range: 606 – 648 MHz
- B range: 626 – 668 MHz
- C range: 734 – 776 MHz
- D range: 780 – 822 MHz
- TH range: 794 – 806 MHz
- JB range: 806 – 810 MHz
- E range: 823 – 865 MHz
- K+ range: 925 – 937.5 MHz
- 1G8 range: 1785 – 1800 MHz

Every frequency range has **21 frequency banks** with up to 12 channels:

You can find information about the frequency presets in the frequency tables of the respective frequency ranges under “Frequency tables”.
INSTALLATION

Installing and starting up ew 100 G4 series devices

You can find information about installing and connecting ew 100 G4 series devices in the following sections.

- **EM 100 G4** rack receiver >> “Installing the EM 100 G4”

- **SKM 100 G4(-S)** handheld transmitter >> “Installing the SKM 100 G4”

- **SK 100 G4** bodypack transmitter >> “Installing the SK 100 G4”

- **ASA 214** antenna splitter >> “Installing the ASA 214”

You can find information about operating the products under “Using ew 100 G4 series devices”.

SENHEISER
Installing the EM 100 G4

These sections contain detailed information about installing and starting up the EM 100 G4.

You can find information about operating the EM 100 G4 under “Using the EM 100 G4”.
Connectors on the rear of the device

Product overview for the rear side of the EM 100 G4

1 Strain relief for the cable of the power supply unit
   • See “Connecting/disconnecting the EM 100 G4 to/from the power supply system”

2 Connecting cables for the power supply unit (DC IN)
   • See “Connecting/disconnecting the EM 100 G4 to/from the power supply system”

3 XLR-3 socket for audio output, balanced (AF OUT BAL)
   • See “Outputting audio signals”

4 6.3 mm jack socket for audio output, unbalanced (AF OUT UNBAL)
   • See “Outputting audio signals”

5 RJ-10 interface (DATA)
   • See “Creating a data network”

6 RJ-10 interface (DATA)
   • See “Creating a data network”

7 BNC socket, antenna input II (ANT II) with remote power supply unit
   • See “Connecting antennas”

8 BNC socket, antenna input I (ANT I) with remote power supply unit
   • See “Connecting antennas”
Connecting/disconnecting the EM 100 G4 to/from the power supply system

Only use the supplied power supply unit. It is designed for your receiver and ensures safe operation.

To connect the EM 100 G4 to the power supply system:
▷ Insert the plug of the power supply unit into the **DC IN** socket of the receiver.
▷ Pass the cable of the power supply unit through the cable grip.
▷ Slide the supplied country adapter onto the power supply unit.
▷ Plug the power supply unit into the wall socket.

To completely disconnect the EM 100 G4 from the power supply system:
▷ Unplug the power supply unit from the wall socket.
▷ Unplug the power supply unit from the **DC IN** socket of the receiver.
Creating a data network

You can cascade multiple EM 100 G4s to a multi-channel system using the two DATA RJ-10 interfaces (up to 12 receivers). You can perform a frequency setup for the entire multi-channel system via this data network using the Easy Setup function.

The setup only works when all of the receivers have the same frequency range.

▷ Connect the receivers to create a multi-channel system using the supplied RJ-10 cables as shown in the diagram.
Both RJ-10 sockets are interchangeable. There is no set order for cabling.

ℹ️ You can find more information about the Easy Setup function under “Easy Setup menu item”.
Setting up a multi-channel system with more than 12 receivers

You can use the **Easy Setup** function to automatically set up a maximum of **12** receivers.

If you assign the frequencies manually, however, you can use up to **20** receivers in a multi-channel system (not possible in the TH, JB, K+ and 1G8 frequency ranges).

▷ To do so, set a frequency manually in each receiver (see "Advanced -> Tune menu item").

▷ Use the frequencies from the following table.

</table>
Outputting audio signals

The EM 100 G4 has a balanced XLR-3M output socket and an unbalanced 6.3 mm jack output socket.

▷ Always use only one of the two AF OUT output sockets for each channel.

To connect an XLR cable:
▷ Plug the XLR cable into the AF OUT BAL socket of the EM 100 G4.

To connect a jack cable:
▷ Plug the jack cable into the AF OUT UNBAL socket of the EM 100 G4.
Connecting antennas

To connect the supplied rod antennas:

▷ Connect the first rod antenna to the **ANT I** socket on the rear side of the EM 100 G4.
▷ Connect the second rod antenna to the **ANT II** socket on the rear side of the EM 100 G4.
▷ Gently angle the rod antennas to the left and right as shown in the figure.

If you are using more than one receiver, we recommend using remote antennas and the ASA 214 antenna splitter. You can find more information here:

- “Installing the ASA 214”
- “Using the ASA 214”
Installing the EM 100 G4 in a rack

CAUTION

Rack mounting poses risks

When installing the device in a closed or multi-rack assembly, please consider that, during operation, the ambient temperature, the mechanical loading and the electrical potentials will be different from those of devices which are not mounted into a rack.

▷ Make sure that the ambient temperature within the rack does not exceed the permissible temperature limit specified in the specifications. See “EM 100 G4”.

▷ Ensure sufficient ventilation; if necessary, provide additional ventilation.

▷ Make sure that the mechanical loading of the rack is even.

▷ When connecting to the power supply system, observe the information indicated on the type plate. Avoid circuit overloading. If necessary, provide overcurrent protection.

▷ When rack mounting, please note that intrinsically harmless leakage currents of the individual power supply units may accumulate, thereby exceeding the allowable limit value. As a remedy, ground the rack via an additional ground connection.
Mounting a single receiver in a rack

To mount the receiver in a rack, you will need the GA 3 rack mounting kit (optional accessory).

To fasten the mounting angle of the GA 3 rack mounting kit:
▷ Unscrew and remove the two recessed head screws (M4x8) on each side of the receiver.
▷ Secure both of the mounting angles to the sides of the receiver using the previously removed recessed head screws.

▷ Secure the blanking plate to one of the mounting angles using two recessed head screws (M6x10).
▷ Attach the AM 2 antenna front mounting set (optional accessory) and mount the rod antennas on the blanking plate (right diagram).

▷ Slide the receiver with the mounted blanking plate into the 19" rack.
▷ Secure the mounting angle and the blanking plate to the 19" rack.
▷ Align the mounted antennas in a V-shape.
Mounting two receivers side by side in a rack

When you mount two receivers side by side, it is only possible to front mount antennas when you use the ASA 214 antenna splitter in combination with the AM 2 front mounting kit and an additional GA 3 rack mounting kit.

To mount the receiver using the GA 3 rack mounting kit (optional accessory):
▷ Place both receivers upside down and side by side on an even surface.
▷ Secure the jointing plate to the transmitters using the six recessed head screws (M3x6).
▷ Secure the mounting angle.
Installing the SKM 100 G4

These sections contain detailed information about installing and starting up the SKM 100 G4.

You can find information about operating the SKM 100 G4 under “Using the SKM 100 G4”.
Inserting and removing the batteries/rechargeable batteries

You can operate the wireless microphone either with batteries (AA, 1.5 V) or with the rechargeable Sennheiser BA 2015 battery.

▷ Screw the rear part of the wireless microphone in the direction of the arrow (counter-clockwise) off of the handle of the wireless microphone.

When you remove the wireless microphone during operation, mute is automatically activated. **MUTE** appears in the display panel. When you screw the microphone back together, mute is deactivated.

▷ Pull the rear part of the wireless microphone all the way out.
▷ Open the cover of the battery compartment.
▷ Place the batteries or the BA 2015 rechargeable battery in the battery compartment as shown on the cover. Please observe correct polarity when inserting the batteries/accupack.

▷ Close the cover.
▷ Push the battery compartment into the handle of the wireless microphone.
▷ Screw the rear part of the wireless microphone back onto the handle.
Battery status

Charge status of the batteries:

<table>
<thead>
<tr>
<th>Status</th>
<th>Battery Level</th>
<th>Estimated Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Battery</td>
<td>100%</td>
<td>&gt; 8 h</td>
</tr>
<tr>
<td></td>
<td>70%</td>
<td>4 - 6 h</td>
</tr>
<tr>
<td></td>
<td>30%</td>
<td>2 - 3 h</td>
</tr>
</tbody>
</table>

Charge status is critical (LOW BATT):

- Battery level indicator shows a low charge.
- The device alerts with a specific warning message.

Sennheiser
Replacing the microphone module

You can find a list of the recommended microphone modules for the handheld transmitter under “Microphones and cables”.

To change the microphone module:
▷ Unscrew the microphone module.
▷ Screw the desired microphone module on.

Do not touch the wireless microphone contacts or the microphone module contacts. If you touch the contacts, they may become dirty or bent.

When you unscrew the microphone module during operation, mute is automatically activated. **MUTE** appears in the display panel. When you screw the microphone module back on, mute is deactivated.
Changing the colored ring

To change the colored ring:
▷ Pull the colored ring off as shown in the diagram.
▷ Attached a colored ring in the color you want as shown in the diagram.
Installing the SK 100 G4

These sections contain detailed information about installing and starting up the SK 100 G4.

You can find information about operating the SK 100 G4 under “Using the SK 100 G4”.
Inserting and removing the batteries/rechargeable batteries

You can operate the bodypack transmitter either with batteries (AA, 1.5 V) or with the rechargeable Sennheiser BA 2015 battery.

▷ Press the two catches and open the battery compartment cover.
▷ Insert the batteries or the rechargeable battery as shown below. Please observe correct polarity when inserting the batteries.
▷ Close the battery compartment.
   The cover locks into place with an audible click.
**Battery status**

Charge status of the batteries:

<table>
<thead>
<tr>
<th>Charge Status</th>
<th>Percentage</th>
<th>Time</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>100 %</td>
<td>&gt; 8 h</td>

<td>4 - 6 h</td>
</tr>
<tr>
<td></td>
<td>30 %</td>
<td>2 - 3 h</td>
</tr>
</tbody>
</table>

**LOW BATT**

Charge status is critical (LOW BATT):
Connecting a microphone to the SK 100 G4

You can find a list of recommended Lavalier and headset microphones for the bodypack transmitter under “Microphones and cables”.

To connect a microphone to the bodypack transmitter:
▷ Insert the cable’s 3.5 mm jack plug into the MIC/LINE socket on the bodypack transmitter as shown in the diagram.
▷ Screw the plug’s coupling ring onto the audio socket thread of the bodypack transmitter.
Connecting an instrument or line source to the SK 100 G4

You can connect instruments or audio sources with a line level to the bodypack transmitter.

To do this, you will need the **Ci 1-N** (6.3 mm jack plug on a lockable 3.5 mm jack plug) or **CL 2** (XLR-3F plug on lockable 3.5 mm jack plug) Sennheiser cables.

To connect an instrument or line source to bodypack transmitter:

- Insert the cable’s 3.5 mm jack plug into the MIC/LINE socket on the bodypack transmitter as shown in the diagram.
- Screw the plug’s coupling ring onto the audio socket thread of the bodypack transmitter.
Attaching the bodypack transmitter to clothing

You can use the belt clip to attach the bodypack transmitter to your waistband or on a guitar strap.

The belt clip is detachable so that you can also attach the bodypack transmitter with the antenna pointing downwards. To do so, withdraw the belt clip from its fixing points and attach it the other way round.

The belt clip is secured so that it cannot slide out of its fixing points accidentally.

To detach the belt clip:

▷ Lift the belt clip as shown in the diagram.
▷ Press one side of the clip downward on the fixing hole and pull it out of the transmitter housing.
▷ Do the same thing on the other side.
Installing the ASA 214

These sections contain detailed information about installing and starting up the ASA 214.

You can find information about operating the ASA 214 under “Using the ASA 214”.
Connectors on the rear of the device

Product overview for the rear side of the ASA 214

1 ANTRF IN B BNC socket
   • Antenna input of diversity branch B
   • See “Connecting antennas”

2 RF OUT A BNC socket
   • RF output only for connecting an additional ASA 214 to build an 8-channel diversity system
   • See “Configuring multi-channel systems”

3 DC IN socket
   • To connect the NT 1-1 power supply unit
   • See “Connecting/disconnecting the ASA 214 to/from the power supply system”

4 4 BNC sockets B1 to B4
   • RF outputs of diversity branch B for connection to the receiver
   • See “Connecting receivers to the ASA 214”

5 ANTRF IN A BNC socket
   • Antenna input of diversity branch A
   • See “Connecting antennas”

6 4 BNC sockets A1 to A4
   • RF outputs of diversity branch A for connection to the receiver
   • Every one of these RF outputs can also provide voltage to a receiver.
   • See “Connecting receivers to the ASA 214”

7 Strain relief for the cable of the power supply unit
   • See “Connecting/disconnecting the ASA 214 to/from the power supply system”
Connecting/disconnecting the ASA 214 to/from the power supply system

To supply power to the ASA 214, the connected receivers and any antenna amplifiers used, you will need the NT 1-1 power supply unit.

Only use the supplied NT 1-1 power supply unit. It is designed for your antenna splitter and ensures safe operation.

To connect the ASA 214 antenna splitter to the power supply system:
▷ Plug the hollow jack plug of the power supply unit into the DC IN socket of the antenna splitter.
▷ Pass the cable of the power supply unit through the cable grip.
▷ Slide the supplied country adapter onto the power supply unit.
▷ Plug the power supply unit into the wall socket.

To completely disconnect the ASA 214 antenna splitter from the power supply system:
▷ Unplug the power supply unit from the wall socket.
▷ Unplug the hollow jack plug of the power supply unit from the DC IN socket of the antenna splitter.
Connecting receivers to the ASA 214

You can connect and operate up to four stationary receivers to the ASA 214.

Sennheiser receivers of the ew G4 and ew G3 series can also be supplied with power from the ASA 214.

The following receivers are compatible:

**evolution wireless G4:**
- EM 100 G4
- EM 300-500 G4

**evolution wireless G3:**
- EM 100 G3
- EM 300 G3
- EM 500 G3

**2000 series:**
- EM 2000 (with its own power supply)
- EM 2050 (with its own power supply)
To connect the receivers to the ASA 214 antenna splitter:

▷ Connect one of the receiver’s antenna inputs to one of the BNC sockets A1 to A4 using one of the supplied BNC cables.

The compatible receivers listed above do not require their own power supply. They are powered via the BNC sockets A1 to A4.

▷ Connect the receiver’s other antenna input to one of the BNC sockets B1 to B4 using one of the supplied BNC cables.
Connecting antennas

For more information about antennas and antenna accessories, see “Antennas and accessories”.

In order to ensure optimal reception even in the case of poor reception conditions, we recommend using remote antennas.

Connecting remote antennas

▷ Mount two antennas or a combination of an antenna and an antenna amplifier to the BNC sockets **ANT RF IN A** and **ANT RF IN B**.

Connecting rod antennas

▷ Mount the antennas to the BNC sockets **ANT RF IN A** and **ANT RF IN B**.
▷ Align the antennas in a V-shape in order to ensure the best possible reception.
Information on antenna amplifiers and cable lengths

The following table shows which cable lengths require the use of the AB 3 or AB 4 antenna amplifier as well as the maximum recommended cable lengths.

<table>
<thead>
<tr>
<th>Device</th>
<th>Frequency range</th>
<th>Number of AB 3 or AB 4</th>
<th>Max. cable length</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASA 214 (AB 3 &amp; AB 4)</td>
<td>500 MHz</td>
<td>0</td>
<td>8 m</td>
</tr>
<tr>
<td></td>
<td></td>
<td>1</td>
<td>36 m</td>
</tr>
<tr>
<td></td>
<td></td>
<td>2</td>
<td>64 m</td>
</tr>
<tr>
<td></td>
<td>700 MHz</td>
<td>0</td>
<td>7 m</td>
</tr>
<tr>
<td></td>
<td></td>
<td>1</td>
<td>30 m</td>
</tr>
<tr>
<td></td>
<td></td>
<td>2</td>
<td>53 m</td>
</tr>
<tr>
<td></td>
<td>900 MHz</td>
<td>0</td>
<td>6 m</td>

<td>4 m</td>
</tr>
<tr>
<td></td>
<td></td>
<td>1</td>
<td>16 m</td>
</tr>
<tr>
<td></td>
<td></td>
<td>2</td>
<td>28 m</td>
</tr>
</tbody>
</table>

Use the **AB 3** for the following frequency ranges:

- **A1 range**: 470 – 516 MHz
- **A range**: 516 – 558 MHz
- **G range**: 566 – 608 MHz
- **GB range**: 606 – 648 MHz
- **B range**: 626 – 668 MHz
- **C range**: 734 – 776 MHz
- **D range**: 780 – 822 MHz
- **TH range**: 794 – 806 MHz
- **JB range**: 806 – 810 MHz
- **E range**: 823 – 865 MHz
- **K+ range**: 925 – 937.5 MHz
- **1G8 range**: 1785 – 1800 MHz

Use the **AB 4** for the following frequency ranges:
- **Aw+ range**: 470 – 558 MHz
- **Gw range**: 558 – 626 MHz
- **GBw range**: 606 – 678 MHz
- **Bw range**: 526 – 698 MHz
- **Cw range**: 718 – 790 MHz
- **Dw range**: 790 – 865 MHz
Configuring multi-channel systems

The following options for connecting multi-channel systems are possible:

Option 1: Two antennas supply a 4-channel system
Option 2: Two 4-channel systems are interconnected

Option 3: Two antennas supply a 8-channel system
Installing the ASA 214 in a rack

CAUTION

Rack mounting poses risks

When installing the device in a closed or multi-rack assembly, please consider that, during operation, the ambient temperature, the mechanical loading and the electrical potentials will be different from those of devices which are not mounted into a rack.

▷ Make sure that the ambient temperature within the rack does not exceed the permissible temperature limit specified in the specifications. See “Specifications”.

▷ Ensure sufficient ventilation; if necessary, provide additional ventilation.

▷ Make sure that the mechanical loading of the rack is even.

▷ When connecting to the power supply system, observe the information indicated on the type plate. Avoid circuit overloading. If necessary, provide overcurrent protection.

▷ When rack mounting, please note that intrinsically harmless leakage currents of the individual power supply units may accumulate, thereby exceeding the allowable limit value. As a remedy, ground the rack via an additional ground connection.
Mounting a single antenna splitter in a rack

To mount the antenna splitter in a rack, you will need the GA 3 rack mounting kit (optional accessory).

To fasten the mounting angle of the GA 3 rack mounting kit:
▷ Unthread and remove the two recessed head screws (M4x8) on each side of the antenna splitter.
▷ Secure the mounting angles to the sides of the antenna splitter using the previously removed recessed head screws.

▷ Secure the blanking plate to one of the mounting angles using two recessed head screws (M6x10).
Attach the antennas. You have the following options:

- Connect the supplied rod antennas on the rear side of the antenna splitter. In this case, cover the antenna holes with the two covers (left diagram).
- Attach the AM 2 antenna front mounting set (optional accessory) and mount the rod antennas on the blanking plate (right diagram).

- Slide the antenna splitter with the mounted blanking plate into the 19” rack.
- Secure the mounting angle and the blanking plate to the 19” rack.
- Align the mounted antennas in a V-shape.
Mounting two antenna splitters side by side in a rack

To mount the antenna splitters using the GA 3 rack mounting kit (optional accessory):

▷ Place both antenna splitters upside down and side by side on an even surface.
▷ Secure the jointing plate to the transmitters using the six recessed head screws (M3x6).
▷ Secure the mounting angle.
OPERATION

Using ew 100 G4 series devices

You can find information about using ew 100 G4 series devices in the following sections.

- **EM 100 G4** rack receiver >> “Using the EM 100 G4”

- **SKM 100 G4(-S)** handheld transmitter >> “Using the SKM 100 G4”

- **SK 100 G4** bodypack transmitter >> “Using the SK 100 G4”

- **ASA 214** antenna splitter>> “Using the ASA 214”

You can find information about installation and start up of the products under “Installing and starting up ew 100 G4 series devices”.
In the sections below, you can find important information about specific use cases.

- Establishing a radio link between the transmitter and receiver >> “Establishing a radio link”

- Synchronizing the receiver settings to the transmitter >> “Synchronizing devices”

- Using the menu of the receiver >> “Displays on the EM 100 G4 display panel”

- Using the menu of the handheld transmitter >> “Displays on the SKM 100 G4 handheld transmitter display panel”

- Using the menu of the bodypack transmitter >> “Displays on the SK 100 G4 bodypack transmitter display panel”
Using the EM 100 G4

These sections contain detailed information about using the EM 100 G4. You can find information on installation and startup of the EM 100 G4 under “Installing the EM 100 G4”.
Operating elements on the front of the device

Product overview for the front of the EM 100 G4

1 Infrared interface with a blue LED
   • See “Synchronizing devices”

2 Display panel
   • See “Displays on the EM 100 G4 display panel”

3 UP/DOWN buttons
   • See “Buttons for navigating through the menu”

4 SYNC button
   • See “Synchronizing devices”

5 ESC button
   • See “Buttons for navigating through the menu”

6 SET button
   • See “Buttons for navigating through the menu”

7 STANDBY button
   • See “Switching the EM 100 G4 on and off”
Switching the EM 100 G4 on and off

To switch the receiver on:
▷ Short-press the STANDBY button.
   The receiver switches on and the **Receiver Parameters** standard display appears.

To switch the receiver to **standby mode**:
▷ If necessary, deactivate the lock-off function (see “Lock-off function”).
▷ Press and hold the STANDBY button until OFF appears on the display panel.
   The display panel switches off.

To **completely switch** the receiver off:
▷ Disconnect the receiver from the power supply system by unplugging the power supply unit from the wall socket.
Muting the audio output

To mute the audio signal of the receiver:
▷ Short-press the **STANDBY** button in one of the standard displays. The RX Mute On? display appears.
▷ Press the **SET** button.
The audio signal is muted.

To cancel the muting:
▷ Short-press the **STANDBY** button. The RX Mute Off? display appears.
▷ Press the **SET** button.
The audio output is no longer muted.
Lock-off function

You can set the automatic lock-off function in the Auto lock menu (see “Auto Lock menu item”).

When you have switched on the lock-off function, you will have to turn the receiver off and on again in order to operate it.

To temporarily deactivate the lock-off function:

▷ Press the SET button.
   Locked appears in the display panel.
▷ Press the UP or DOWN button.
   Unlock? appears in the display panel.
▷ Press the SET button.
   Lock-off function is now temporarily deactivated.

When you are in the operating menu

>> Lock-off function is deactivated long enough for you to work in the operating menu.

When one of the standard displays is shown

>> Lock-off function is automatically activated after 10 seconds.

The Lock-off function icon flashes while the lock-off function is being activated again.
Displays on the EM 100 G4 display panel

**Status information** such as reception quality, battery status, audio level, etc. is displayed on the **home screen** of the display panel.

- See “Home screen”.

The display panel also displays the **operating menu** which you can use to configure all of the **settings**.

- See “Setting options in the menu”.

Buttons for navigating through the menu

To navigate through the EM 100 G4 operating menu, you need the following buttons.

![Image of EM 100 G4 display panel with buttons labeled UP, ESC, SET, DOWN]

**Short-press the ESC button**

- Cancels the entry and returns to the previous display

**Long-press the ESC button**

- Cancels the entry and returns to the home screen
Press the **SET** button
- Changes from the current standard display to the operating menu
- Calls up a menu item
- Changes to a submenu
- Stores the settings and returns to the operating menu

Press the **UP** or **DOWN** button
- Selects a standard display (see “Home screen”)
- Changes to the previous or next menu item
- Changes the setting of a menu item
Home screen

After you switch on the receiver, the display panel initially displays the Sennheiser logo. After a short time, the home screen is then displayed.

The home screen has three different standard displays.

▷ On the home screen, press the UP and DOWN buttons to switch between the standard displays.

Receiver Parameters standard display

1 RF RF level (radio frequency)
   • RF signal level display
   • including the display of the squelch threshold (see “Squelch menu item”)

2 AF audio level (audio frequency)
   • Displays the audio level of the received transmitter
     When the display shows full deflection, the audio input level is excessively high. When the transmitter is overloaded frequently or for extended periods of time, the PEAK display is shown inverted.
   • See “AF Out menu item”

3 Frequency bank and channel
   • Current frequency bank and channel number
   • See “Frequency Preset menu item”

4 Frequency
   • Current receiving frequency
   • See “Frequency Preset menu item”

5 Name
   • Freely selectable name of the receiver
   • See “Name menu item”

6 P pilot tone
• Activated pilot tone evaluation
• See “Advanced -> Pilot Tone menu item”

7 **MUTE** muting function

- Receiver or transmitter is muted
- See “Muting the audio output”

8 Battery status of the transmitter

- SKM 100 G4: see “Inserting and removing the batteries/rechargeable batteries”
- SK 100 G4: see “Inserting and removing the batteries/rechargeable batteries”

9 Lock-off function

- Lock-off function is activated on the receiver
- See “Lock-off function”

**Soundcheck standard display**

The Soundcheck standard display shows the transmission quality between the transmitter and the receiver.

By doing a soundcheck, you can ensure adequate transmission quality in the entire area in which you want to use the transmitter. You can do the soundcheck without the help of another person.

▷ With the transmitter, walk up and down the area in which you want to use the transmitter.

The receiver records the following parameters:

- **RF Min**
  - Minimum RF signal level
  - must be well above the squelch threshold level for one of the two antennas

**Ways to optimize**

▷ Check that the antennas and the antenna cables are correctly connected.
▷ Improve the position of the antennas.
▷ If necessary, use an antenna booster.
RF Max

- Maximum RF signal level
- Both antennas should reach 40 dBμV

Ways to optimize

▷ Check that the antennas and the antenna cables are correctly connected.
▷ Improve the position of the antennas.
▷ If necessary, use an antenna booster.

AF Max

Maximum audio level

Ways to optimize

On your transmitter, adjust the audio level as high as possible without the display for the audio level showing full deflection (AF Max is at a level with the PEAK display).

See “AF Out menu item”.

Guitar Tuner standard display

The Guitar Tuner standard display shows the guitar tuner (only for the SK 100 G4).

The Guitar Tuner standard display is deactivated upon delivery. To show this standard display, you have to activate it (see “Advanced -> Guitar Tuner menu item”).
Setting options in the menu

In the EM 100 G4 menu, you can configure the following settings.

- **Adjusting the squelch threshold**
  - See “Squelch menu item”

- **Scanning for unused frequency presets, releases and selects frequency presets**
  - See “Easy Setup menu item”

- **Setting the frequency bank and the channel**
  - See “Frequency Preset menu item”

- **Entering a freely selectable name**
  - See “Name menu item”

- **Adjusting the audio output level**
  - See “AF Out menu item”

- **Adjusting the frequency response of the output signal**
  - See “Equalizer menu item”

- **Activate/deactivate the automatic lock-off function**
  - See “Auto Lock menu item”

- **Configuring enhanced settings in the Advanced Menu:**
  - Adjusting the receiving frequencies for the U frequency bank
  - Adjusting the guitar tuner options
  - Activating/deactivating the pilot tone evaluation
  - Adjusting the contrast of the display panel
  - Resetting the receiver
  - Displaying the current software revision
  - See “Advanced menu item”
Menu structure

The figure shows the complete EM 100 G4 menu structure in an overview.
Squelch menu item

You can adjust the squelch threshold in the Squelch menu item.

Setting range:

- **Low** >> 5 dBμV
- **Middle** >> 15 dBμV
- **High** >> 25 dBμV

The squelch threshold is displayed on the home screen in the RF signal level area.

---

**CAUTION**

**Risk of hearing and material damage**

If you set the squelch threshold to a very low value, a very loud hissing noise can occur in the receiver. This hissing noise can be loud enough to cause hearing damage or overload your system’s loudspeakers.

▷ Before adjusting the squelch threshold, set the volume of the audio output to the minimum.

▷ Never change the squelch threshold during a live transmission.
To open the **Squelch** menu item:

▷ On the home screen, press the **SET** button to open the operating menu.
▷ Press the **UP** or **DOWN** button until the **Squelch** menu item appears in the selection frame.
▷ Press the **SET** button to open the menu item.
▷ Adjust the settings as desired.

- Press the **SET** button to save the changes you made to the settings.
  or
- Press the **ESC** button to cancel the entry without saving the setting.
Easy Setup menu item

You can scan for unused frequencies using the Easy Setup menu item.

When you have connected multiple EM 100 G4 devices to a network via the RJ-10 interfaces (see “Creating a data network”), you can perform the frequency setup for all of the connected receivers. You can find more information about connecting multiple devices under “Performing multi-channel frequency setup”

Switch off all transmitters before you perform the scan. If transmitters are still switched on, they are detected as unavailable frequencies and the frequencies that are actually available cannot then be used.

The squelch threshold setting influences the result. Set the squelch threshold to Low for as many frequencies as possible, and to High for as many safe frequencies as possible (see “Squelch menu item”).

To open the Easy Setup menu item:
▷ On the home screen, press the SET button to open the operating menu.
▷ Press the UP or DOWN button until the Easy Setup menu item appears in the selection frame.
▷ Press the SET button to open the menu item.

Scan New List

▷ Select Scan New List to scan for unused frequencies.
▷ Press the SET button to start the scan.
   The frequency range of the receiver is scanned. As a result, the number of unused frequencies is displayed for every frequency bank.
▷ Press the UP or DOWN buttons to select a frequency bank.
▷ Press the SET button to confirm your selection.
▷ Press the UP or DOWN buttons to select an unused frequency from the selected bank.
Press the **SET** button to save your selection and synchronize the selected frequency with the transmitter at a later point (see “Synchronizing devices”).

or

Press the **SYNC** button to synchronize the selected frequency with the transmitter immediately.

**Current List**

Select **Current List** to show the list of unused frequencies from the last scan.

**Reset**

Select **Reset List** to delete the list of unused frequencies.

**Performing multi-channel frequency setup**

To perform the automatic frequency setup for multiple receivers (max. 12) simultaneously:

1. Connect all of the receivers to one network.
   See “Creating a data network”.

2. Open the **Easy Setup** menu item on one of the receivers.
   This receiver is the master. You can choose any receiver to be the master.

3. Perform the frequency scan on the master receiver as described above.
   After the scan, the display panels of the other receivers will display the message **Assign New Frequency?**.
   Receivers with non-compatible frequency ranges will display the message **Unassignable Frequency!**.

4. Select an unused frequency for the first receiver on the master receiver.
5. Press the **SET** button on the receiver that you would like to assign this frequency to.
6. Use this procedure to assign a frequency to each connected receiver, one after another.
7. For the last step, assign a frequency to the master receiver.
   This completes the multi-channel frequency setup.
Using the EM 100 G4

- 516 - 558 MHz
- 516 - 558 MHz
- 823 - 865 MHz
- 734 - 776 MHz
Setting up a multi-channel system with more than 12 receivers

You can use the Easy Setup function to automatically set up a maximum of 12 receivers.

If you assign the frequencies manually, however, you can use up to 20 receivers in a multi-channel system (not possible in the JB, K+ and 1G8 frequency ranges).

- To do so, set a frequency manually in each receiver (see "Advanced -> Tune menu item").
- Use the frequencies from the following table.

</table>
Frequency Preset menu item

In the Frequency Preset menu item, you can adjust the receiving frequency of the receiver by adjusting the frequency bank and the channel.

To open the Frequency Preset menu item:

▷ On the home screen, press the SET button to open the operating menu.
▷ Press the UP or DOWN button until the Frequency Preset menu item appears in the selection frame.
▷ Press the SET button to open the menu item.
▷ Adjust the settings as desired.

► Press the SET button to save the changes you made to the settings.

or

► Press the ESC button to cancel the entry without saving the setting.

You can set the frequencies of the frequency bank U here: “Advanced -> Tune menu item”
Name menu item

In the **Name** menu item you can enter a name for the radio link.

To open the **Name** menu item:
- On the home screen, press the **SET** button to open the operating menu.
- Press the **UP** or **DOWN** button until the **Name** menu item appears in the selection frame.
- Press the **SET** button to open the menu item.
- Adjust the settings as desired.

- Press the **SET** button to save the changes you made to the settings.
- Press the **ESC** button to cancel the entry without saving the setting.
AF Out menu item

In the **AF Out** menu item, you can set the audio level that is output via the receiver audio outputs.

**Setting range:**
- –24 dB to +18 dB in 3 dB steps

To open the **AF Out** menu item:
- On the home screen, press the **SET** button to open the operating menu.
- Press the **UP** or **DOWN** button until the **AF Out** menu item appears in the selection frame.
- Press the **SET** button to open the menu item.
- Adjust the settings as desired.

Press the **SET** button to save the changes you made to the settings.

or

Press the **ESC** button to cancel the entry without saving the setting.
Equalizer menu item

In the **Equalizer** menu item, you can change the frequency response of the output signal. You can reduce the bass range and boost the treble range.

To open the **Equalizer** menu item:
- On the home screen, press the **SET** button to open the operating menu.
- Press the **UP** or **DOWN** button until the **Equalizer** menu item appears in the selection frame.
- Press the **SET** button to open the menu item.
- Adjust the settings as desired.

Press the **UP** or **DOWN** buttons to configure the desired settings.
Press the **SET** button to save the changes you made to the settings.
or
Press the **ESC** button to cancel the entry without saving the setting.
Auto Lock menu item

In the **Auto Lock** menu item you can activate or deactivate the auto lock-off function.

ℹ️ You can find information about temporarily deactivating the lock-off function during operation under “Lock-off function”.

To open the **Auto Lock** menu item:

▷ On the home screen, press the **SET** button to open the operating menu.
▷ Press the **UP** or **DOWN** button until the **Auto Lock** menu item appears in the selection frame.
▷ Press the **SET** button to open the menu item.
▷ Adjust the settings as desired.

► Press the **SET** button to save the changes you made to the settings.

or

► Press the **ESC** button to cancel the entry without saving the setting.
Advanced menu item

In the Advanced submenu you can configure enhanced settings.

To open the Advanced submenu:
▷ On the home screen, press the SET button to open the operating menu.
▷ Press the UP or DOWN button until the Advanced menu item appears in the selection frame.
▷ Press the SET button to open the menu item.

The following sub-items are available:

---

Adjusting the receiving frequencies for the U frequency bank
▷ See “Advanced -> Tune menu item”

---

Adjusting the guitar tuner options
▷ See “Advanced -> Guitar Tuner menu item”

---

Activating/deactivating the pilot tone evaluation
▷ See “Advanced -> Pilot Tone menu item”

---

Adjusting the contrast of the display panel
▷ See “Advanced -> LCD Contrast menu item”

---

Resetting the receiver
▷ See “Advanced -> Reset menu item”

---

Displaying the current software revision
▷ See “Advanced -> Software Revision menu item”
Advanced -> Tune menu item

In the **Tune** menu item of the **Advanced** submenu, you can configure the receiving frequencies for the **U** frequency bank.

You can save a total of 12 frequencies in the **U** frequency bank.

**Only adjusting the frequency**

▷ Open the **Tune** menu item in the **Advanced** menu.
▷ Adjust the settings.

▷ Press the **SET** button to save the changes you made to the settings.
or
▷ Press the **ESC** button to cancel the entry without saving the setting.

**Setting the channel and frequency**

▷ Select the **Tune** menu item and call it up by holding down the **SET** button until the channel selection appears.
▷ Adjust the settings.

▷ Press the **SET** button to save the changes you made to the settings.
or
▷ Press the **ESC** button to cancel the entry without saving the settings.
Advanced -> Guitar Tuner menu item

In the **Guitar Tuner** menu item of the **Advanced** submenu, you can adjust the options of the guitar tuner.

The guitar tuner is opened in the **Guitar Tuner** standard display on the home screen. See “**Guitar Tuner** standard display”.

- **Inactive**: The guitar tuner is deactivated.
- **Active**: The guitar tuner is activated.
- **Audio mute**: The guitar tuner is activated. Once the **Guitar Tuner** standard display is open on the home screen, the audio signal is muted.

Advanced -> Pilot Tone menu item

In the **Pilot Tone** menu item of the **Advanced** submenu, you can activate and deactivate the pilot tone evaluation.

The pilot tone has an inaudible frequency that is sent from the transmitter and evaluated by the receiver. It supports the receiver’s squelch function.

- For the best possible operational reliability, we recommend leaving the pilot tone activated.
Advanced -> LCD Contrast menu item

In the **LCD Contrast** menu item of the Advanced submenu, you can adjust the display contrast of the display panel.

---

Advanced -> Reset menu item

In the **Reset** menu item of the Advanced submenu, you can reset all of the settings of the receiver to the factory settings.

---

Advanced -> Software Revision menu item

In the **Software Revision** menu item of the Advanced submenu, you can display the current software version of the receiver.
Using the SKM 100 G4

These sections contain detailed information about using the SKM 100 G4 and SKM 100 G4-S.

You can find information on installation and startup of the SKM 100 G4 and SKM 100 G4-S under “Installing the SKM 100 G4”.
Using the SKM 100 G4

Operating elements of the SKM 100 G4 handheld transmitter

1 Display panel
   • See “Displays on the SKM 100 G4 handheld transmitter display panel”

2 Infra-red interface
   • See “Synchronizing devices”

3 DOWN, UP and SET multi-function switch
   • See “Buttons for navigating the SKM 100 G4 menu”

4 ON/OFF button with ESC function in the operating menu
   • Switch the transmitter on or off
     See “Switching the SKM 100 G4 handheld transmitter on and off”
   • Escape function in the menu
     See “Buttons for navigating the SKM 100 G4 menu”

5 Colored ring
   • Available in different colors (see “Additional accessories” and “Changing the colored ring”)
   • Can be turned to protect the multi-function switch
6 Operation and battery indicator, red LED
   • illuminated = ON
     See “Switching the SKM 100 G4 handheld transmitter on and off”
   • flashing = LOW BATTERY
     See “Inserting and removing the batteries/rechargeable batteries”

7 MIC button (only SKM 100 G4-S)
   • See “Muting the handheld transmitter (AF mute)”
   • See “Advanced > Mute Mode menu item (SKM 100 G4-S only)”

Switching the SKM 100 G4 handheld transmitter on and off

To switch on the SKM 100 G4:
▷ Hold down the ON/OFF button until the Sennheiser logo appears on the display.

To switch off the SKM 100 G4:
▷ Hold down the ON/OFF button until the display goes off.
Muting the handheld transmitter (AF mute)

**SKM 100 G4**
The audio signal of the transmitter cannot be muted. However, when you deactivate the RF signal no AF signal is output. See “Deactivating the RF signal (RF mute)“.

**SKM 100 G4-S**
You can mute the audio signal by pressing the **MIC** button.

- The **MIC** button lights up red: the audio signal is activated
- The **MIC** button is not lit: the audio signal is muted
Deactivating the RF signal (RF mute)

You can temporarily deactivate the RF signal when the microphone is switched on. When the RF signal is deactivated, no audio signal is output.

Use this function to save battery or when you want to prepare a microphone for use during live broadcast without interfering with the current transmission path.

To deactivate the RF signal:
▷ Short-press the **ON/OFF** button.
   RF Mute On? appears.
▷ Press the **SET** button.
   The transmission frequency is displayed, however the wireless microphone is not transmitting an RF signal. The transmission icon is not lit (see “Displays on the SKM 100 G4 handheld transmitter display panel”).

To activate the RF signal:
▷ Short-press the **ON/OFF** button.
   RF Mute Off? appears.
▷ Press the **SET** button.
   The transmission icon appears again (see “Displays on the SKM 100 G4 handheld transmitter display panel”).
Lock-off function

You can set the automatic lock-off function in the Auto lock menu (see “Buttons for navigating the SKM 100 G4 menu”).

When you have switched on the lock-off function, you will have to turn the transmitter off and on again in order to operate it.

To temporarily deactivate the lock-off function:

▷ Press the SET button.
  Locked appears in the display panel.
▷ Press the UP or DOWN button.
  Unlock? appears in the display panel.
▷ Press the SET button.
  Lock-off function is now temporarily deactivated.
Displays on the SKM 100 G4 handheld transmitter display panel

You can view the following information on the transmitter display.

1 **AF audio level**
   - Displays the audio level with peak hold function
   - See “Sensitivity menu item”

2 Frequency
   - Configured transmission frequency
   - See “Frequency Preset menu item”

3 Name
   - Freely selectable name of the receiver
   - See “Name menu item”

4 Transmission icon
   - RF signal is being transmitted
   - See “Deactivating the RF signal (RF mute)”

5 Lock-off function
   - Lock-off function is activated
   - See “Auto Lock menu item”

6 Battery status
   - See “Battery status”

7 **MUTE** muting function
   - The audio signal is muted
   - See “Muting the handheld transmitter (AF mute)”
   - See “Deactivating the RF signal (RF mute)”

8 **P** pilot tone
   - Pilot tone transmission is activated
   - See “Advanced > Pilot Tone menu item”
"Buttons for navigating the SKM 100 G4 menu"
"Setting options in the menu"

Select a standard display
>
Move the **multi-function switch** to select a standard display:

**Name/Channel** standard display

![Name/Channel display](image)
Buttons for navigating the SKM 100 G4 menu

Navigating through the menu

To open the menu:
▷ Press the SET button.
   The operating menu is shown on the transmitter display panel.

To open a menu item:
▷ Press the UP or DOWN buttons to navigate through the individual menu items.
▷ Press the SET button to open the selected menu item.

“Operating elements of the SKM 100 G4 handheld transmitter”

Making changes in a menu item

After you open a menu item, you can make changes as follows:
▷ Press the UP or DOWN buttons to set the displayed value.
▷ Press the SET button to save the setting.
▷ Press the ESC (ON/OFF) button to leave the menu item without saving the setting.

“Operating elements of the SKM 100 G4 handheld transmitter”

>> “Displays on the SKM 100 G4 handheld transmitter display panel”
>> “Setting options in the menu”
Setting options in the menu
In the SKM 100 G4 menu, you can configure the following settings.

---

**Adjusting the input sensitivity**
▷ See “Sensitivity menu item”

---

**Setting the frequency bank and the channel**
▷ See “Frequency Preset menu item”

---

**Entering a freely selectable name**
▷ See “Name menu item”

---

**Activating/deactivating the automatic lock-off function**
▷ See “Auto Lock menu item”

---

**Configuring enhanced settings in the Advanced Menu:**
- Adjusting the transmission frequencies for the U frequency bank
- Defining the MIC button setting (SKM 100 G4-S only)
- Activating/deactivating the pilot tone evaluation
- Adjusting the contrast of the display panel
- Resetting the transmitter
- Displaying the current software revision
▷ See “Advanced menu item”
Sensitivity menu item

- Adjusting the input sensitivity – AF audio level

**Setting range:** 0 dB to -48 dB in 6 dB steps.

The AF audio level is also displayed when the wireless microphone is muted, e.g. to check the sensitivity before a live broadcast.

**Recommended presets:**
- Loud music/vocals: -48 to -18 dB
- Moderation: -18 to -12 dB
- Interviews: -12 to 0 dB
Frequency Preset menu item

- Manually selecting a frequency bank and channel

```
Menu    Frequency Preset
B.Ch:  1.1
```

```
Frequency Preset
B.Ch:  1.1
516.200 MHz
```

```
Frequency Preset
B.Ch:  20.1
533.875 MHz
```

„Stored“

While you work in the Frequency Preset menu, the RF signal is deactivated.

**Please note when creating multi-channel systems:**

Only the factory-preset frequencies within one frequency bank are intermodulation-free. The wireless microphone and receiver must be set to the same frequency. Be sure to note the information on frequency selection under “Establishing a radio link”.

Name menu item

- Entering names

```
Menu    Name
Lichael
```

```
Name
Lichael
```

```
Name
Michael
```

„Stored“

In the **Name** menu item you can enter any name you want for the wireless microphone (e.g. the names of the musicians).

The name can be shown in the **Frequency/Name** and **Name/Channel** standard displays.

The names are a maximum of 8 characters:

- All letters except umlauts.
- Numbers from 0 to 9
- Special characters and spaces

Enter the names as follows:

- Move the multi-function switch to select a character.
- Press the multi-function switch to jump to the next space or to save the name you have entered once it is complete.
Auto Lock menu item

- Switching the automatic lock-off function on and off

This lock prevents the wireless microphone from being unintentionally switched off and also prevents any unintentional changes to the transmitter’s configuration. In the current standard display, the lock icon shows whether the lock-off function is currently switched on.

You can find information about using the lock-off function under “Lock-off function”.

„Stored”
### Advanced menu item

In the **Advanced** submenu you can configure enhanced settings.

The following sub-items are available:

<table>
<thead>
<tr>
<th>Sub-item</th>

</table>
Advanced > Tune menu item

- Configuring the transmission frequency and frequency bank U

When you have configured the wireless microphone to a system bank and you call up the Tune menu item, channel 1 of the frequency bank U is automatically set. The message U.1 briefly appears in the display. In the factory settings, the channels of the frequency bank U are not assigned to any transmission frequency.

While you work in the Tune menu, the RF signal is deactivated.

You can configure a transmission frequency for the current channel or select a channel in the frequency bank U and configure a transmission frequency for this channel in the Tune menu. Be sure to note the information on frequency selection, see “Setting notes”.

Only adjusting the frequency

To configure the transmission frequency for the current channel:

▷ Open the Tune menu item in the Advanced menu.
  The frequency selection appears.

▷ Configure the desired frequency.
▷ Press the multi-function switch.
  Your settings will be saved. You are now back in the operating menu.

Setting the channel and frequency

To select a channel and assign it a frequency:

▷ Move the multi-function switch until the Tune menu item appears.
▷ Hold down the multi-function switch until the frequency bank selection appears.

▷ Set the desired channel.
▷ Press the multi-function switch.
  The frequency selection appears.
▷ Configure the frequency.
Advanced > Mute Mode menu item (SKM 100 G4-S only)

- Configuring the function of the MIC button

**AF On/Off mode**
- When you press the MIC button, no audio signal is transmitted.

**Disabled mode**
- No function

You can find information about the MIC button under “Muting the handheld transmitter (AF mute)”.

Advanced > Pilot Tone menu item

- Activating/deactivating pilot tone transmission

The pilot tone has an inaudible frequency that is sent from the transmitter and evaluated by the receiver. It supports the receiver’s squelch function.

Advanced > LCD Contrast menu item

- Adjusting the contrast of the display panel

You can configure the contrast of the display in 16 steps.
Advanced > Reset menu item

- Resetting the wireless microphone

When you reset the wireless microphone, only the selected settings of the pilot tone and the U frequency bank are retained.

Advanced > Software Revision menu item

- Show software revision

You can display the current software revision.
Using the SK 100 G4

These sections contain detailed information about using the SK 100 G4. You can find information on installation and startup of the SK 100 G4 under “Installing the SK 100 G4”.

Operating elements of the SK 100 G4 bodypack transmitter

1 Display panel
   • See “Displays on the SK 100 G4 bodypack transmitter display panel”

2 Operation and battery indicator, red LED
   • illuminated = ON
     See “Switching the SK 100 G4 bodypack transmitter on and off”
   • flashing = LOW BATTERY
     See “Inserting and removing the batteries/rechargeable batteries”

3 Audio overload indicator, yellow LED
   • illuminated = AF PEAK (overload)
     See “Sensitivity menu item”

4 UP button
   • See “Buttons for navigating the SK 100 G4 menu”

5 SET button
   • See “Buttons for navigating the SK 100 G4 menu”

6 DOWN button
   • See “Buttons for navigating the SK 100 G4 menu”
7 **ON/OFF** button with ESC function in the operating menu
   • Switch the transmitter on or off
     See “Switching the SK 100 G4 bodypack transmitter on and off”
   • Escape function in the menu
     See “Buttons for navigating the SK 100 G4 menu”

8 Infra-red interface
   • See “Synchronizing devices”

9 **MUTE** switch
   • Deactivate and activate audio signal
     See “Muting the bodypack transmitter (AF mute)”
   • Deactivate and activate RF signal
     See “Deactivating the RF signal (RF mute)”

---

**Switching the SK 100 G4 bodypack transmitter on and off**

▷ Press the two catches and open the battery compartment cover.

To switch on the SK 100 G4:

▷ Hold down the **ON/OFF** button until the Sennheiser logo appears on the display.

To switch off the SK 100 G4:

▷ Hold down the **ON/OFF** button until the display goes off.
Muting the bodypack transmitter (AF mute)

You can deactivate the audio signal with the MUTE switch.

To do this, the MUTE switch function must be configured to AF On/Off. You can find more information about this subject under “Advanced > Mute Mode menu item”.

► Slide the MUTE switch to the MUTE position.

The audio signal is muted. The message MUTE is shown on the display.
Deactivating the RF signal (RF mute)
You can deactivate the RF signal in two ways:

Deactivating the RF signal with the MUTE switch
You can deactivate the RF signal with the MUTE switch.
To do this, the MUTE switch function must be configured to RF On/Off.
You can find more information about this subject under “Advanced > Mute Mode menu item”.

►
> Slide the **MUTE** switch to the **MUTE** position.

The RF signal is deactivated. The message **MUTE** is shown in the display and the transmission icon no longer appears.
Deactivating the RF signal with the **ON/OFF** button

You can deactivate the RF signal with the **ON/OFF** button.

To deactivate the RF signal:
- Short-press the **ON/OFF** button.
  
  RF Mute On? appears.
- Press the **SET** button.
  
  The RF signal is deactivated. The message MUTE is shown in the display and the transmission icon no longer appears.

To activate the RF signal:
- Short-press the **ON/OFF** button.
  
  RF Mute Off? appears.
- Press the **SET** button.
  
  The transmission icon appears again.
Lock-off function

You can set the automatic lock-off function in the Auto lock menu (see “Buttons for navigating the SK 100 G4 menu”).

When you have switched on the lock-off function, you will have to turn the transmitter off and on again in order to operate it.

To temporarily deactivate the lock-off function:
▷ Press the SET button.
   Locked appears in the display panel.
▷ Press the UP or DOWN button.
   Unlock? appears in the display panel.
▷ Press the SET button.
   Lock-off function is now temporarily deactivated.
Displays on the SK 100 G4 bodypack transmitter display panel

You can view the following information on the transmitter display.

1 AF audio level
   • Displays the audio level with peak hold function
   • See “Sensitivity menu item”

2 Frequency
   • Configured transmission frequency
   • See “Frequency Preset menu item”

3 Name
   • Freely selectable name of the receiver
   • See “Name menu item”

4 Transmission icon
   • RF signal is being transmitted
   • See “Deactivating the RF signal (RF mute)”

5 Lock-off function
   • Lock-off function is activated
   • See “Auto Lock menu item”

6 Battery status
   • See “Battery status”

7 MUTE muting function
   • The audio signal is muted
   • See “Muting the bodypack transmitter (AF mute)”
   • See “Deactivating the RF signal (RF mute)”

8 P pilot tone
   • Pilot tone transmission is activated
   • See “Advanced > Pilot Tone menu item”
Select a standard display

- Press the UP or DOWN buttons to select a standard display.

**Frequency/Name standard display**

![Frequency/Name Display]

**Channel/Frequency standard display**

**Name/Channel standard display**

![Name/Channel Display]
Buttons for navigating the SK 100 G4 menu

Navigating through the menu

To open the menu:
▷ Press the SET button.
   The operating menu is shown on the transmitter display panel.

To open a menu item:
▷ Press the UP or DOWN buttons to navigate through the individual menu items.
▷ Press the SET button to open the selected menu item.

“Operating elements of the SK 100 G4 bodypack transmitter”

Making changes in a menu item

After you open a menu item, you can make changes as follows:
▷ Press the UP or DOWN buttons to set the displayed value.
▷ Press the SET button to save the setting.
▷ Press the ESC (ON/OFF) button to leave the menu item without saving the setting.

“Operating elements of the SK 100 G4 bodypack transmitter”

>> “Displays on the SK 100 G4 bodypack transmitter display panel”
>> “Setting options in the menu”
Setting options in the menu

In the SK 100 G4 menu, you can configure the following settings.

---

**Adjusting the input sensitivity**
▷ See “Sensitivity menu item”

---

**Setting the frequency bank and the channel**
▷ See “Frequency Preset menu item”

---

**Entering a freely selectable name**
▷ See “Name menu item”

---

**Activating/deactivating the automatic lock-off function**
▷ See “Auto Lock menu item”

---

**Configuring enhanced settings in the Advanced Menu:**
- Adjusting the transmission frequencies for the U frequency bank
- Configuring the MUTE switch
- Configuring the guitar cable emulation
- Activating/deactivating the pilot tone evaluation
- Adjusting the contrast of the display panel
- Resetting the transmitter
- Displaying the current software revision
▷ See “Advanced menu item”

---
Sensitivity menu item
• Adjusting the input sensitivity – AF audio level

Setting range: 0 dB to –60 dB in 6 dB steps.

The AF audio level is also displayed when the bodypack transmitter is muted, e.g. to check the sensitivity before a live broadcast.

Recommended presets:
• Loud music/vocals: –30 to –21 dB
• Moderation: -21 to 0 dB
• Electric guitar with single-coil pickups: –30 to -24 dB
• Electric guitar with Humbucker pickups: -45 to -30 dB
• Electric guitars with active electronics: -45 to -30 dB

Frequency Preset menu item
• Manually selecting a frequency bank and channel

While you work in the Frequency Preset menu, the RF signal is deactivated.

Please note when creating multi-channel systems:
Only the factory-preset frequencies within one frequency bank are inter-modulation-free. The bodypack transmitter and receiver must be set to the same frequency. Be sure to note the information on frequency selection under “Establishing a radio link”.

Name menu item

- Entering names

In the **Name** menu item you can enter any name you want for the bodypack transmitters (e.g. the names of the musicians).

The name can be shown in the Frequency/Name and Name/Channel standard displays.

The names are a maximum of 8 characters:

- All letters except umlauts.
- Numbers from 0 to 9
- Special characters and spaces

Enter the names as follows:

▶ Press the **UP** or **DOWN** buttons to select a character.
▶ Press the **SET** button to switch to the next space or to save the name you have entered once it is complete.

Auto Lock menu item

- Switching the automatic lock-off function on and off

This lock prevents the wireless microphone from being unintentionally switched off and also prevents any unintentional changes to the transmitter’s configuration. In the current standard display, the lock icon shows whether the lock-off function is currently switched on.

You can find information about using the lock-off function under “Lock-off function”.

---

**“Stored”**

In the **Name** menu item you can enter any name you want for the bodypack transmitters (e.g. the names of the musicians).

The name can be shown in the Frequency/Name and Name/Channel standard displays.

The names are a maximum of 8 characters:

- All letters except umlauts.
- Numbers from 0 to 9
- Special characters and spaces

Enter the names as follows:

▶ Press the **UP** or **DOWN** buttons to select a character.
▶ Press the **SET** button to switch to the next space or to save the name you have entered once it is complete.

**“Stored”**

This lock prevents the wireless microphone from being unintentionally switched off and also prevents any unintentional changes to the transmitter’s configuration. In the current standard display, the lock icon shows whether the lock-off function is currently switched on.

You can find information about using the lock-off function under “Lock-off function”.

---

**SENHEISER**
Advanced menu item

In the **Advanced** submenu you can configure enhanced settings.

The following sub-items are available:

---

### Adjusting the transmission frequencies for the U frequency bank
- See “Advanced > Tune menu item”

---

### Configuring the MUTE switch
- See “Advanced > Mute Mode menu item”

---

### Configuring the guitar cable emulation
- See “Advanced > Cable Emulation menu item”

---

### Activating/deactivating the pilot tone evaluation
- See “Advanced > Pilot Tone menu item”

---

### Adjusting the contrast of the display panel
- See “Advanced > LCD Contrast menu item”

---

### Resetting the transmitter
- See “Advanced > Reset menu item”

---

### Displaying the current software revision
- See “Advanced > Software Revision menu item”

---
Advanced > Tune menu item

- Configuring the transmission frequency and frequency bank U

When you have configured the bodypack transmitter to a system bank and you call up the Tune menu item, channel 1 of the frequency bank U is automatically set. The message U.1 briefly appears in the display. In the factory settings, the channels of the frequency bank U are not assigned to any transmission frequency.

While you work in the Tune menu, the RF signal is deactivated.

You can configure a transmission frequency for the current channel or select a channel in the frequency bank U and configure a transmission frequency for this channel in the Tune menu. Be sure to note the information on frequency selection, see “Setting notes”.

Only adjusting the frequency

To configure the transmission frequency for the current channel:

▷ Open the Tune menu item in the Advanced menu.

   The frequency selection appears.

   ![Advanced Menu Tune 553.875 MHz](image)

   „Stored“

   ▷ Configure the desired frequency.
   ▷ Press the SET button.

   Your settings will be saved. You are now back in the operating menu.

Setting the channel and frequency

To select a channel and assign it a frequency:

▷ Open the Tune menu item in the Advanced menu by pressing and holding the SET button until the frequency bank selection appears.

   ![Advanced Menu Tune 543.200 MHz](image)

   „Stored“

   ▷ Set the desired channel.
   ▷ Press the SET button.

   The frequency selection appears.
   ▷ Configure the frequency.
Advanced > Mute Mode menu item

- Configuring the **MUTE** switch

  • **AF On/Off** mode
    - If set to position MUTE, the audio signal is muted.
  
  • **RF On/Off** mode
    - If set to position MUTE, the RF signal is deactivated.
  
  • **Disabled** mode
    - No function

You can find information about operating the mute switch under “Muting the bodypack transmitter (AF mute)” and “Deactivating the RF signal (RF mute)”.

Advanced > Cable Emulation menu item

- Emulating a guitar cable

  • **Cable Emulation** mode
    - Using this menu item you can emulate the capacitances of your guitar cables and influence the sound of your guitar.
Advanced > Pilot Tone menu item

- Activating/deactivating pilot tone transmission

The pilot tone has an inaudible frequency that is sent from the transmitter and evaluated by the receiver. It supports the receiver's squelch function.

Advanced > LCD Contrast menu item

- Adjusting the contrast of the display panel

You can configure the contrast of the display in 16 steps.

Advanced > Reset menu item

- Resetting the bodypack transmitter

When you reset the bodypack transmitter, only the selected settings of the pilot tone and the U frequency bank are retained.

Advanced > Software Revision menu item

- Show software revision

You can display the current software revision.
Establishing a radio link

To establish a radio link between the transmitter and receiver, the same frequency must be set in both devices.

You can do this in a number of different ways:

1. Use the Easy Setup function to perform an automatic frequency setup (see “Easy Setup menu item”).
2. Set a frequency in the receiver manually (see “Frequency Preset menu item”) and synchronize it with the transmitter (see “Synchronizing devices”).
3. Set the frequency on the receiver and the transmitter manually (EM 100 G4: “Frequency Preset menu item”, SKM 100 G4: “Frequency Preset menu item”, SK 100 G4: “Frequency Preset menu item”) Setting notes

Please note the following when synchronizing a transmitter with a receiver:

▷ Only use transmitters and receivers from the same frequency range (see the type plate on the transmitter and receiver).
▷ Make sure that your chosen frequencies are listed in the frequency table for the particular frequency range (see “Frequency tables”).
▷ Ensure that the desired frequencies are permitted in your country and apply for an operating license if necessary.

Please note the information at the following address:

General conditions and restrictions for the use of frequencies
Synchronizing devices

You can synchronize ew 100 G4 series transmitters and receivers via the receiver’s infrared interface.

The following **Parameters** are transferred to the transmitters:

- **Frequency Preset** >> currently configured frequency (see “Frequency Preset menu item”)

- **Name** >> individually configured name (see “Name menu item”)

- **Pilot Tone** >> current setting of the pilot tone on the receiver (see “Advanced -> Pilot Tone menu item”)

To synchronize the devices:

▷ Switch the transmitter and the receiver on.
▷ Press the **SYNC** button on the receiver.
  
  **Sync** appears in the receiver’s display and the blue LED turns blue.

▷ Hold the infra-red interface of the transmitter (see “Operating elements...
of the SKM 100 G4 handheld transmitter” and “Operating elements of the SK 100 G4 bodypack transmitter”) in front of the infra-red interface of the receiver (see “Operating elements on the front of the device”).

The parameters are transferred to the transmitter. The blue LED blinks during transmission.

When the transfer is complete, a tick appears in the receiver’s display as a confirmation. Then the receiver will return to the current standard display.

To cancel synchronization:
▷ Press the ESC button on the receiver.
   An X appears in the display.

This icon also appears when:
• no transmitter is found or the transmitter is not compatible.
• no transmitter is found and the synchronization process automatically ends after 30 seconds.
Using the ASA 214

These sections contain detailed information about operating the ASA 214. You can find information on installation and startup of the ASA 214 under “Installing the ASA 214”.
Operating elements on the front of the device

1 STANDBY button
   • See “Switching the ASA 214 on and off”

2 LED: Operation indicator
Switching the ASA 214 on and off

To switch on the antenna splitter:

▷ Short-press the STANDBY button.

The antenna splitter switches on and the power LED turns green.
The RF signals of the connected antennas are distributed to all connected receivers.

To switch the antenna splitter to standby mode:

▷ Press the STANDBY button for approx. 2 seconds.

The LED turns off. The connected antenna amplifiers are switched off.
Connected receivers are switched off if they draw their supply voltage from the BNC sockets A1 to A4 (see “Connecting receivers to the ASA 214”).

To fully switch off the antenna splitter:

▷ Disconnect the antenna splitter from the power supply system by unplugging the power supply unit from the wall socket.

The LED turns off.
SPECIFICATIONS

Overview

In the sections below, you can find information about the different variants of the products in the ew 100 G4 series as well as technical data for the individual products.

• Product variants and frequency variants >> “Product variants”
• Frequency tables with overviews of all banks and channels >> “Frequency tables”
• Product-specific technical data >> “Specifications”
• Information about plug assignments >> “Pin assignment”

You can also find information about safely cleaning and maintaining evolution wireless G4 series products.

• “Cleaning and maintenance”

Pin assignment

3.5 mm stereo jack plug

- Plug for headphone and earphone cables, e.g. IE 4.
- Connect to:
  - EK IEM G4
  - EK 500 G4

3.5 mm mic jack plug

- Plug for lavalier and headset microphone, e.g. ME 2.
- Connect to:
  - SK 100 G4
  - SK 300 G4
  - SK 500 G4

3.5 mm line jack plug

- Plug for line and instrument cables, e.g. Ci 1-N
- Connect to:
  - SK 100 G4
  - SK 300 G4
  - SK 500 G4

6.3 mm stereo jack plug, balanced (audio in/loop out)

- Connect to:
  - SR IEM G4 Audio In
  - SR IEM G4 Loop Out
6.3 mm mono jack plug, unbalanced

- Connect to:
  - EM 100 G4 Audio Out
  - EM 300-500 G4 Audio Out

6.3 mm stereo jack plug for headphone jack

- Connect to:
  - EM 100 G4 headphone input
  - EM 300-500 G4 headphone input
  - SR IEM G4 headphone input

XLR-3 plug, balanced

Hollow jack plug for power supply
Cleaning and maintenance

Note the following information when cleaning and maintaining evolution wireless G4 series products.

**CAUTION**

**Liquids can damage the products’ electronics.**

Liquids entering the product housing can cause a short-circuit and damage the electronics.

▷ Keep all liquids away from the products.
▷ Do not use any solvents or cleansing agents.

▷ Disconnect the products from the power supply system and remove rechargeable batteries and batteries before you begin cleaning.
▷ Clean all products only with a soft, dry cloth.

▷ Note the special cleaning instructions below for the following products.

**Cleaning the sound inlet basket of the microphone module**

▷ Unscrew the top sound inlet basket from the microphone module by turning it counterclockwise.
▷ Remove the foam insert.

You can clean the sound inlet basket in two ways:

▷ Use a slightly damp cloth to clean the top sound inlet basket from the inside and outside.
▷ Use a brush and rinse with clean water.
▷ If necessary, clean the foam insert with a mild detergent or replace the foam insert.
▷ Dry the top sound inlet basket and foam insert.
▷ Reinsert the foam insert.
▷ Screw the sound inlet basket back onto the microphone module.
From time to time, you should also clean the microphone module contacts:
▷ Wipe the contacts of the microphone module with a soft, dry cloth.
