PRODUCT INFORMATION

Overview

You can find information about the individual products in the ew 100 P G4 series under “ew 100 P G4 series products”.

For information about the available accessories, see “Accessories”.

You can find information about the ew 100 P G4 series frequency bank system under “The frequency bank system”.

---

SENNHEISER
ew 100 P G4 series products

You can also find more information here:

- A variety of **frequency variants** are available from the individual products. You can find more information under “Product variants”.
- You can find **technical specifications** about the individual products under “Specifications”.
- You can find information about **installing** the products under “Installing ew 100 P G4 series devices”.
- You can find information about **operating** the products under “Using ew 100 P G4 series devices”.

EK 100 G4 diversity receiver

You can find more detailed information about the EK 100 G4 in the following sections:

- **Installation and Startup**: “Installing the EK 100 G4”
- **Operation**: “Using the EK 100 G4”
- **Technical Data**: “EK 100 G4”
SKM 100 G4 handheld transmitter

SKM 100 G4 variant:

SKM 100 G4-S variant:

The SKM 100 G4 handheld transmitter is also available in the SKM 100 G4-S variant with an integrated mute switch.

You can find more detailed information about the SKM 100 G4 in the following sections:

- **Installation and Startup**: “Installing the SKM 100 G4”
- **Operation**: “Using the SKM 100 G4”
- **Technical Data**: “SKM 100 G4”
You can find more detailed information about the SK 100 G4 in the following sections:

- **Installation and Startup**: “Installing the SK 100 G4”
- **Operation**: “Using the SK 100 G4”
- **Technical Data**: “SK 100 G4”
SKP 100 G4 plug-on transmitter

You can find more detailed information about the SKP 100 G4 in the following sections:

- **Installation and Startup**: “Installing the SKP 100 G4”
- **Operation**: “Using the SKP 100 G4”
- **Technical Data**: “SKP 100 G4”
Accessories

A variety of accessories are available for the ew 100 P G4 series.
Microphones and cables

Microphone modules
We recommend using the following microphone modules with the SKM 100 G4 and SKM 100 G4-S handheld transmitters.

<table>
<thead>
<tr>

You can find more information about the individual microphones on their respective product pages at www.sennheiser.com.
Line connecting cable

The following cables can be used to connect cameras to the EK 100 G4 diversity receiver:

- **CL 1**
  3.5 mm jack plug on lockable 3.5 mm jack plugs
  Article no. 005022

- **CL 100**
  XLR-3 on a 3.5 mm jack plug
  Article no. 087046
Rechargeable battery and charger

BA 2015 rechargeable battery

The BA 2015 rechargeable battery is designed for use with evolution wireless G4 series handheld transmitters, bodypack transmitters and bodypack receivers.

Article no. 009950

L 2015 charger

The BA 2015 rechargeable battery can be charged in the L 2015 charger on its own or inside of the bodypack transmitter/bodypack receiver.

Article no. 009828
Accessories for camera mounting

CA 2 camera adapter

Camera adapter with hot shoe for portable bodypack transmitters/receivers from the ew G1, G2, G3 and G4 series.

Article no. 009986
Additional accessories

Color labeling set

- **KEN 2**, color labeling set for SKM handheld transmitters
  Article no. 530195

Microphone clamp

- **MZQ 1**, microphone clamp for SKM handheld transmitters
  Article no. 076670
The frequency bank system

There are different frequency ranges in the UHF band available for transmission.

The following frequency ranges are available for the ew 100 G4 series:

- **A1 range**: 470 – 516 MHz
- **A range**: 516 – 558 MHz
- **AS range**: 520 – 558 MHz
- **G range**: 566 – 608 MHz
- **GB range**: 606 – 648 MHz
- **B range**: 626 – 668 MHz
- **C range**: 734 – 776 MHz
- **D range**: 780 – 822 MHz
- **TH range**: 794 – 806 MHz
- **JB range**: 806 – 810 MHz
- **E range**: 823 – 865 MHz
- **K+ range**: 925 – 937.5 MHz

Every frequency range has 21 frequency banks with up to 12 channels:

You can find information about the frequency presets in the frequency tables of the respective frequency ranges under “Frequency tables”.

![Diagram showing frequency banks and channels](image-url)
INSTALLATION

Installing ew 100 P G4 series devices

You can find information about installing and connecting ew 100 P G4 series devices in the following sections.

- **EK 100 G4** diversity receiver >> “Installing the EK 100 G4”

- **SKM 100 G4** handheld transmitter >> “Installing the SKM 100 G4”

- **SK 100 G4** bodypack transmitter >> “Installing the SK 100 G4”

- **SKP 100 G4** plug-on transmitter >> “Installing the SKP 100 G4”

You can find information about operating the products under “Using ew 100 P G4 series devices”.

SENNEHEISER
Installing the EK 100 G4

These sections contain detailed information about installing the EK 100 G4.

You can find information about operating the EK 100 G4 under “Using the EK 100 G4”.

Inserting and removing the batteries/rechargeable batteries

You can operate the diversity receiver either with batteries (AA, 1.5 V) or with the rechargeable Sennheiser BA 2015 battery.

▷ Press the two catches and open the battery compartment cover.
▷ Insert the batteries or the rechargeable battery as shown below. Please observe correct polarity when inserting the batteries.

▷ Close the battery compartment.
The cover locks into place with an audible click.
Battery status

Charge status of the batteries:

<table>
<thead>
<tr>

<td></td>
<td>70 %</td>
<td>4 - 6 h</td>
</tr>
<tr>
<td></td>
<td>30 %</td>
<td>2 - 3 h</td>
</tr>
</tbody>
</table>

LOW BATT

Charge status is critical (LOW BATT):
Attaching the diversity receiver to a camera

You can attach the diversity receiver on the hot shoe of the camera with the included CA 2 camera kit.

To attach the EK 100 G4 diversity receiver to a camera:
▷ Determine where on the perforated plate you need to attach the hot shoe adapter so that the diversity receiver can be optimally attached to the camera.
▷ Place a square nut under the perforated plate at this position.
▷ Affix the hot shoe adapter to the perforated plate with the square nut.
- Lift the belt clip.
- Press one side of the clip downward on the fixing hole and pull it out of the housing.
- Do the same thing on the other side.

- Place the perforated plate on the rear side of the diversity receiver.
- Reattach the clip.
▶ Slide the receiver onto a camera.
Connecting the diversity receiver to a camera

To connect the diversity receiver to a camera:

► Attach the line input of the camera to the jack socket of the receiver using one of the enclosed line connecting cables.
Adjust the level of the AF Out audio output in the operating menu of the diversity receiver based on the input level of the camera (see “AF Out menu item”).

The shielding of the line cable acts as an antenna for the second diversity branch. For details on the pin assignment, see “Pin assignment”.
Installing the SKM 100 G4

These sections contain detailed information about installing and starting up the SKM 100 G4.

You can find information about operating the SKM 100 G4 under “Using the SKM 100 G4”.
Installing the SKM 100 G4

Inserting and removing the batteries/rechargeable batteries

You can operate the wireless microphone either with batteries (AA, 1.5 V) or with the rechargeable Sennheiser BA 2015 battery.

- Screw the rear part of the wireless microphone in the direction of the arrow (counter-clockwise) off of the handle of the wireless microphone.

  When you remove the wireless microphone during operation, mute is automatically activated. **MUTE** appears in the display panel. When you screw the microphone back together, mute is deactivated.

- Pull the rear part of the wireless microphone all the way out.
- Open the cover of the battery compartment.
- Place the batteries or the BA 2015 rechargeable battery in the battery compartment as shown on the cover. Please observe correct polarity when inserting the batteries/accupack.

- Close the cover.
- Push the battery compartment into the handle of the wireless microphone.
- Screw the rear part of the wireless microphone back onto the handle.
### Battery status

Charge status of the batteries:

<table>
<thead>
<tr>
<th>Charge Status</th>
<th>Percentage</th>
<th>Duration</th>
</tr>
</thead>
<tbody>
<tr>
<td>►</td>
<td>100 %</td>
<td>&gt; 8 h</td>
</tr>
<tr>
<td></td>
<td>70 %</td>
<td>4 - 6 h</td>
</tr>
<tr>
<td></td>
<td>30 %</td>
<td>2 - 3 h</td>
</tr>
</tbody>
</table>

Charge status is critical (LOW BATT):
Replacing the microphone module

You can find a list of the recommended microphone modules for the handheld transmitter under “Microphones and cables”.

To change the microphone module:
▷ Unscrew the microphone module.
▷ Screw the desired microphone module on.

Do not touch the wireless microphone contacts or the microphone module contacts. If you touch the contacts, they may become dirty or bent.

When you unscrew the microphone module during operation, mute is automatically activated. MUTE appears in the display panel. When you screw the microphone module back on, mute is deactivated.
Changing the colored ring

To change the colored ring:

▷ Pull the colored ring off as shown in the diagram.

▷ Attached a colored ring in the color you want as shown in the diagram.
Installing the SK 100 G4

These sections contain detailed information about installing and starting up the SK 100 G4.

You can find information about operating the SK 100 G4 under “Using the SK 100 G4”.
Inserting and removing the batteries/rechargeable batteries

You can operate the bodypack transmitter either with batteries (AA, 1.5 V) or with the rechargeable Sennheiser BA 2015 battery.

▷ Press the two catches and open the battery compartment cover.
▷ Insert the batteries or the rechargeable battery as shown below. Please observe correct polarity when inserting the batteries.
▷ Close the battery compartment.
   The cover locks into place with an audible click.
**Battery status**

Charge status of the batteries:

<table>
<thead>
<tr>
<th>Charge status</th>

<td>70 %</td>
<td>4 - 6 h</td>
</tr>
<tr>
<td></td>
<td>30 %</td>
<td>2 - 3 h</td>
</tr>
</tbody>
</table>

Charge status is critical (LOW BATT):

- Image of a Sennheiser device with battery level indicator.
Connecting a microphone to the SK 100 G4

You can find a list of recommended Lavalier and headset microphones for the bodypack transmitter under “Microphones and cables”.

To connect a microphone to the bodypack transmitter:
▷ Insert the cable’s 3.5 mm jack plug into the MIC/LINE socket on the bodypack transmitter as shown in the diagram.
▷ Screw the plug’s coupling ring onto the audio socket thread of the bodypack transmitter.
Connecting an instrument or line source to the SK 100 G4

You can connect instruments or audio sources with a line level to the bodypack transmitter.

To do this, you will need the **Ci 1-N** (6.3 mm jack plug on a lockable 3.5 mm jack plug) or **CL 2** (XLR-3F plug on lockable 3.5 mm jack plug) Sennheiser cables.

To connect an instrument or line source to bodypack transmitter:

▷ Insert the cable’s 3.5 mm jack plug into the MIC/LINE socket on the bodypack transmitter as shown in the diagram.
▷ Screw the plug’s coupling ring onto the audio socket thread of the bodypack transmitter.
Installing the SK 100 G4

Attaching the bodypack transmitter to clothing

You can use the belt clip to attach the bodypack transmitter to your waistband or on a guitar strap.

The belt clip is detachable so that you can also attach the bodypack transmitter with the antenna pointing downwards. To do so, withdraw the belt clip from its fixing points and attach it the other way round.

The belt clip is secured so that it cannot slide out of its fixing points accidentally.

To detach the belt clip:

▷ Lift the belt clip as shown in the diagram.
▷ Press one side of the clip downward on the fixing hole and pull it out of the transmitter housing.
▷ Do the same thing on the other side.
Installing the SKP 100 G4

These sections contain detailed information about installing the SKP 100 G4.

You can find information about operating the SKP 100 G4 under “Using the SKP 100 G4”.
Inserting and removing the batteries/rechargeable batteries

You can operate the plug-on transmitter either with batteries (AA, 1.5 V) or with the rechargeable Sennheiser BA 2015 battery.

▷ Slide the battery compartment cover in the direction of the embossed arrow and open the cover.
▷ Insert the batteries or the accupack as shown below. Please observe correct polarity when inserting the batteries/accupack.

▷ Close the battery compartment.
   The cover locks into place with an audible click.

LOW BATT

Charge status is critical (LOW BATT):

548.100 MHz

ew100 G4

AF P
Attaching the plug-on transmitter to the microphone

Microphones with a metal casing should be used for optimal signal transmission.

▷ Loosen the locking ring (2) by rotating it in the clockwise direction past the center point.
   This unlocks the XLR-3 plug (1) of the plug-on transmitter.
▷ Connect the plug-on transmitter's XLR-3 plug (1) to the XLR-3 socket of the microphone.
▷ Tighten the locking ring (2) by rotating it counter-clockwise in the direction of the arrow.
OPERATION

Using ew 100 P G4 series devices

You can find information about using ew 100 P G4 series devices in the following sections.

- **EK 100 G4** diversity receiver >> “Using the EK 100 G4”

- **SKM 100 G4** handheld transmitter >> “Using the SKM 100 G4”

- **SK 100 G4** bodypack transmitter >> “Using the SK 100 G4”

- **SKP 100 G4** plug-on transmitter >> “Using the SKP 100 G4”

You can find information about installing the products under “Installing ew 100 P G4 series devices”.

 SENNHEISER
In the sections below, you can find important information about specific use cases.

- Establishing a **radio link** between the transmitter and receiver >> “Establishing a radio link”

- **Synchronizing** the receiver **settings** to the transmitter >> “Synchronizing devices”

- Using the **menu** of the diversity **receiver** >> “Displays on the EK 100 G4 display panel”

- Using the **menu** of the **handheld transmitter** >> “Displays on the SKM 100 G4 handheld transmitter display panel”

- Using the **menu** of the **bodpack transmitter** >> “Displays on the SK 100 G4 bodpack transmitter display panel”

- Using the menu of the **plug-on transmitter** >> “Displays on the SKP 100 G4 plug-on transmitter display panel”
Using the EK 100 G4

These sections contain detailed information about using the EK 100 G4. You can find information about installing the EK 100 under “Installing the EK 100 G4”.
Operating elements of the EK 100 G4 diversity receiver

1 Display panel
   • See “Displays on the EK 100 G4 display panel”

2 Operation and battery indicator, red LED
   • illuminated = ON
     See “Switching the EK 100 G4 on and off”
   • flashing = LOW BATTERY
     See “Inserting and removing the batteries/rechargeable batteries”

3 Wireless reception indicator, green LED
   • illuminated = RF

4 UP button
   • See “Buttons for navigating through the menu”

5 SET button
   • See “Buttons for navigating through the menu”

6 DOWN button
   • See “Buttons for navigating through the menu”
Using the EK 100 G4

**7 ON/OFF button with ESC function in the operating menu**
- Switch the transmitter on or off
  See “Switching the EK 100 G4 on and off”
- Escape function in the menu
  See “Buttons for navigating through the menu”

**8 Infra-red interface**
- See “Synchronizing devices”

**9 3.5 mm jack socket**
- lockable
  See “Connecting the diversity receiver to a camera”

**Switching the EK 100 G4 on and off**
▷ Press the two catches and open the battery compartment cover.

To switch the receiver on:
▷ Hold down the ON/OFF button until the Sennheiser logo appears on the display.

To switch the receiver off:
▷ Hold down the ON/OFF button until the display goes off.
Lock-off function

You can set the automatic lock-off function in the Auto lock menu (see “Auto Lock menu item”).

When you have switched on the lock-off function, you will have to turn the transmitter off and on again in order to operate it.

To temporarily deactivate the lock-off function:

▷ Press the SET button.
  Locked appears in the display panel.
▷ Press the UP or DOWN button.
  Unlock? appears in the display panel.
▷ Press the SET button.
  Lock-off function is now temporarily deactivated.

When you are in the operating menu

>> Lock-off function is deactivated long enough for you to work in the operating menu.

When one of the standard displays is shown

>> Lock-off function is automatically activated after 10 seconds.

The Lock-off function icon flashes while the lock-off function is being activated again.
Displays on the EK 100 G4 display panel

**Status information** such as reception quality, battery status, audio level, etc. is displayed on the **home screen** of the display panel. See “Home screen”.

The display panel also displays the **operating menu** which you can use to configure all of the **settings**. See “Setting options in the menu”.

---
Buttons for navigating through the menu

To navigate through the EK 100 G3 operating menu, you need the following buttons.

- **Press the ON/OFF button**
  - ESC function: Cancels the entry and returns to the current standard display
  - Selects a standard display (see “Home screen”)

- **Press the SET button**
  - Changes from the current standard display to the operating menu
  - Calls up a menu item
  - Changes to a submenu
  - Stores the settings and returns to the operating menu
Press the **UP** or **DOWN** button

- Changes to the previous or next menu item
- Changes the setting of a menu item
Home screen

After you switch on the receiver, the display panel initially displays the Sennheiser logo. After a short time, the home screen is then displayed.

The home screen has two different standard displays.

▷ Short-press the **ON/OFF** button to switch between the standard displays.

**Frequency/Name standard display**

1 RF RF level (radio frequency)
   - RF signal level display
   - including the display of the squelch threshold (see “Squelch menu item”)

2 AF audio level (audio frequency)
   - Displays the audio level of the received transmitter
     When the display shows full deflection, the audio input level is excessively high.
   - See “AF Out menu item”

3 Frequency
   - Current receiving frequency
   - See “Frequency Preset menu item”

4 Name
   - Freely selectable name of the receiver
   - See “Name menu item”

5 Lock-off function
   - Lock-off function is activated on the receiver
   - See “Lock-off function”
6 Battery status of the receiver
   • See “Inserting and removing the batteries/rechargeable batteries”

7 MUTE muting function
   • No RF signal received

8 P pilot tone
   • P = Activated pilot tone evaluation
   • No symbol = Evaluation is deactivated
   • P is black = Pilot tone is being received on the current frequency
   • See “Advanced -> Pilot Tone menu item”

Frequency Bank/Channel/Name standard display
The Frequency Bank/Channel/Name standard display shows the level of
the line output AF Out instead of the MUTE muting function.
Setting options in the menu
In the EK 100 G4 menu, you can configure the following settings.

**Synchronizing the transmitter with the diversity receiver**
▷ See “Sync menu item”

**Adjusting the squelch threshold**
▷ See “Squelch menu item”

**Scanning for unused frequency presets, releases and selects frequency presets**
▷ See “Easy Setup menu item”

**Setting the frequency bank and the channel**
▷ See “Frequency Preset menu item”

**Entering a freely selectable name**
▷ See “Name menu item”

**Adjusting the audio output level**
▷ See “AF Out menu item”

**Activate/deactivate the automatic lock-off function**
▷ See “Auto Lock menu item”

**Configuring enhanced settings in the Advanced Menu:**
- Adjusting the receiving frequencies for the U frequency bank
- Activating/deactivating the pilot tone evaluation
- Adjusting the contrast of the display panel
- Resetting the receiver
- Displaying the current software revision
▷ See “Advanced menu item”
Menu structure

The figure shows the complete EK 100 G4 menu structure in an overview.
Sync menu item

In the Sync menu item you can synchronize ew 100 P G4 series transmitters and receivers.

For more information, see “Establishing a radio link”.
Squelch menu item

You can adjust the squelch threshold in the **Squelch** menu item.

**Setting range:**
- **Low** >> 5 dBμV
- **Middle** >> 15 dBμV
- **High** >> 25 dBμV

The squelch threshold is displayed on the home screen in the RF signal level area.

To open the **Squelch** menu item:
- On the home screen, press the **SET** button to open the operating menu.
- Press the **UP** or **DOWN** button until the **Squelch** menu item appears in the selection frame.
- Press the **SET** button to open the menu item.
- Adjust the settings as desired.

Press the **SET** button to save the changes you made to the settings.

or

Press the **ON/OFF** button to cancel the entry without saving the settings.
CAUTION

Risk of hearing and material damage

If you set the squelch threshold to a very low value, a very loud hissing noise can occur in the receiver. This hissing noise can be loud enough to cause hearing damage or overload your system’s loudspeakers.

▷ Before adjusting the squelch threshold, set the volume of the audio output to the minimum.

▷ Never change the squelch threshold during a live transmission.
Easy Setup menu item

You can scan for unused frequencies using the **Easy Setup** menu item.

Switch off all transmitters before you perform the scan. If transmitters are still switched on, they are detected as unavailable frequencies and the frequencies that are actually available cannot then be used.

To open the **Easy Setup** menu item:

▷ On the home screen, press the **SET** button to open the operating menu.
▷ Press the **UP** or **DOWN** button until the **Easy Setup** menu item appears in the selection frame.
▷ Press the **SET** button to open the menu item.
▷ Adjust the settings as desired.

- **Scan New List**: Automatically searches for unused receiving frequencies (frequency preset scan):

  ![Easy Setup Scan New List](image1)

  **“Stored”**

- **Current List**: Selects an unused frequency preset:

  ![Easy Setup Current List](image2)

  **“Stored”**

- **Reset List**: Releases all occupied frequency presets and selects an unused frequency preset:

  ![Easy Setup Reset List](image3)

  **“Stored”**
Press the **SET** button to save the changes you made to the settings.

or

Press the **ON/OFF** button to cancel the entry without saving the settings.
Frequency Preset menu item

In the **Frequency Preset** menu item, you can adjust the receiving frequency of the receiver by adjusting the frequency bank and the channel.

To open the **Frequency Preset** menu item:
- On the home screen, press the **SET** button to open the operating menu.
- Press the **UP** or **DOWN** button until the **Frequency Preset** menu item appears in the selection frame.
- Press the **SET** button to open the menu item.
- Adjust the settings as desired.

► Press the **SET** button to save the changes you made to the settings.

or

► Press the **ON/OFF** button to cancel the entry without saving the settings.
Name menu item

In the Name menu item you can enter a name for the radio link.

To open the Name menu item:
▷ On the home screen, press the SET button to open the operating menu.
▷ Press the UP or DOWN button until the Name menu item appears in the selection frame.
▷ Press the SET button to open the menu item.
▷ Adjust the settings as desired.

► Press the SET button to save the changes you made to the settings.
or
▷ Press the ON/OFF button to cancel the entry without saving the settings.
AF Out menu item

In the AF Out menu item you can adjust the level of the line audio output based on the level of the connected camera.

Setting range:
• -30 dB to +12 dB in 6 dB steps

To open the AF Out menu item:
▷ On the home screen, press the SET button to open the operating menu.
▷ Press the UP or DOWN button until the AF Out menu item appears in the selection frame.
▷ Press the SET button to open the menu item.
▷ Adjust the settings as desired.

„Stored“

▷ Press the SET button to save the changes you made to the settings.
or
▷ Press the ON/OFF button to cancel the entry without saving the settings.
Auto Lock menu item

In the **Auto Lock** menu item you can activate or deactivate the auto lock-off function.

> You can find information about temporarily deactivating the lock-off function during operation under “Lock-off function”.

To open the **Auto Lock** menu item:

▷ On the home screen, press the **SET** button to open the operating menu.
▷ Press the **UP** or **DOWN** button until the **Auto Lock** menu item appears in the selection frame.
▷ Press the **SET** button to open the menu item.
▷ Adjust the settings as desired.

Press the **SET** button to save the changes you made to the settings.

or

Press the **ON/OFF** button to cancel the entry without saving the settings.
Advanced menu item

In the Advanced submenu you can configure enhanced settings.

To open the Advanced submenu:
▷ On the home screen, press the SET button to open the operating menu.
▷ Press the UP or DOWN button until the Advanced menu item appears in the selection frame.
▷ Press the SET button to open the menu item.

The following sub-items are available:

---

Adjusting the receiving frequency for the frequency bank U
▷ See “Advanced -> Tune menu item”

---

Activating/deactivating the pilot tone evaluation
▷ See “Advanced -> Pilot Tone menu item”

---

Adjusting the contrast of the display panel
▷ See “Advanced -> LCD Contrast menu item”

---

Resetting the receiver
▷ See “Advanced -> Reset menu item”

---

Displaying the current software revision
▷ See “Advanced -> Software Revision menu item”

---
Advanced -> Tune menu item

In the Tune menu item of the Advanced submenu, you can configure the receiving frequencies for the U frequency bank.

Only adjusting the frequency

▷ Open the Tune menu item in the Advanced menu.
▷ Adjust the settings.

Setting the channel and frequency

▷ Select the menu item and call it up by holding down the SET button until the channel selection appears.

Advanced -> Pilot Tone menu item

In the Pilot Tone menu item of the Advanced submenu, you can activate and deactivate the pilot tone evaluation.

The pilot tone has an inaudible frequency that is sent from the transmitter and evaluated by the receiver. It supports the receiver’s squelch function.
**Advanced -> LCD Contrast menu item**

In the **LCD Contrast** menu item of the **Advanced** submenu, you can adjust the display contrast of the display panel in 16 steps.

**Advanced -> Reset menu item**

In the **Reset** menu item of the **Advanced** submenu, you can reset the settings of the receiver.

When you reset the diversity receiver, only the selected settings of the pilot tone and the **U** frequency bank are retained.

**Advanced -> Software Revision menu item**

In the **Software Revision** menu item of the **Advanced** submenu, you can display the current software version of the receiver.
Using the SKM 100 G4

These sections contain detailed information about using the SKM 100 G4 and SKM 100 G4-S.

You can find information on installation and startup of the SKM 100 G4 and SKM 100 G4-S under “Installing the SKM 100 G4”.
Using the SKM 100 G4

Operating elements of the SKM 100 G4 handheld transmitter

1 Display panel
   • See “Displays on the SKM 100 G4 handheld transmitter display panel”

2 Infra-red interface
   • See “Synchronizing devices”

3 DOWN, UP and SET multi-function switch
   • See “Buttons for navigating the SKM 100 G4 menu”

4 ON/OFF button with ESC function in the operating menu
   • Switch the transmitter on or off
     See “Switching the SKM 100 G4 handheld transmitter on and off”
   • Escape function in the menu
     See “Buttons for navigating the SKM 100 G4 menu”

5 Colored ring
   • Available in different colors (see “Additional accessories” and “Changing the colored ring”)
   • Can be turned to protect the multi-function switch
6 Operation and battery indicator, red LED
- illuminated = ON
  See “Switching the SKM 100 G4 handheld transmitter on and off”
- flashing = LOW BATTERY
  See “Inserting and removing the batteries/rechargeable batteries”

7 MIC button (only SKM 100 G4-S)
- See “Muting the handheld transmitter (AF mute)”
- See “Advanced > Mute Mode menu item (SKM 100 G4-S only)”

Switching the SKM 100 G4 handheld transmitter on and off
To switch on the SKM 100 G4:
▷ Hold down the ON/OFF button until the Sennheiser logo appears on the display.

To switch off the SKM 100 G4:
▷ Hold down the ON/OFF button until the display goes off.
Muting the handheld transmitter (AF mute)

**SKM 100 G4**

The audio signal of the transmitter cannot be muted. However, when you deactivate the RF signal no AF signal is output. See “Deactivating the RF signal (RF mute)”.

**SKM 100 G4-S**

You can mute the audio signal by pressing the **MIC** button.

- The **MIC** button lights up red: the audio signal is activated
- The **MIC** button is not lit: the audio signal is muted
Deactivating the RF signal (RF mute)

You can temporarily deactivate the RF signal when the microphone is switched on. When the RF signal is deactivated, no audio signal is output.

Use this function to save battery or when you want to prepare a microphone for use during live broadcast without interfering with the current transmission path.

To deactivate the RF signal:
▷ Short-press the ON/OFF button.

**RF Mute On?** appears.
▷ Press the SET button.

The transmission frequency is displayed, however the wireless microphone is not transmitting an RF signal. The transmission icon is not lit (see “Displays on the SKM 100 G4 handheld transmitter display panel”).

To activate the RF signal:
▷ Short-press the ON/OFF button.

**RF Mute Off?** appears.
▷ Press the SET button.

The transmission icon appears again (see “Displays on the SKM 100 G4 handheld transmitter display panel”).
Lock-off function

You can set the automatic lock-off function in the Auto lock menu (see “Buttons for navigating the SKM 100 G4 menu”).

When you have switched on the lock-off function, you will have to turn the transmitter off and on again in order to operate it.

To temporarily deactivate the lock-off function:
▷ Press the SET button.
  Locked appears in the display panel.
▷ Press the UP or DOWN button.
  Unlock? appears in the display panel.
▷ Press the SET button.
  Lock-off function is now temporarily deactivated.
Displays on the SKM 100 G4 handheld transmitter display panel

You can view the following information on the transmitter display.

1 **AF** audio level
   - Displays the audio level with peak hold function
   - See “Sensitivity menu item”

2 Frequency
   - Configured transmission frequency
   - See “Frequency Preset menu item”

3 Name
   - Freely selectable name of the receiver
   - See “Name menu item”

4 Transmission icon
   - RF signal is being transmitted
   - See “Deactivating the RF signal (RF mute)”

5 Lock-off function
   - Lock-off function is activated
   - See “Auto Lock menu item”

6 Battery status
   - See “Battery status”

7 **MUTE** muting function
   - The audio signal is muted
   - See “Muting the handheld transmitter (AF mute)”
   - See “Deactivating the RF signal (RF mute)”

8 **P** pilot tone
   - Pilot tone transmission is activated
   - See “Advanced > Pilot Tone menu item”
Using the SKM 100 G4

>> “Buttons for navigating the SKM 100 G4 menu”

Buttons for navigating the SKM 100 G4 menu

Navigating through the menu

To open the menu:
▷ Press the SET button.
   The operating menu is shown on the transmitter display panel.

To open a menu item:
▷ Press the UP or DOWN buttons to navigate through the individual menu items.
▷ Press the SET button to open the selected menu item.

“Operating elements of the SKM 100 G4 handheld transmitter”

Making changes in a menu item

After you open a menu item, you can make changes as follows:
▷ Press the UP or DOWN buttons to set the displayed value.
▷ Press the SET button to save the setting.
▷ Press the ESC (ON/OFF) button to leave the menu item without saving the setting.

“Operating elements of the SKM 100 G4 handheld transmitter”

>> “Displays on the SKM 100 G4 handheld transmitter display panel”
>> “Setting options in the menu”
Setting options in the menu

In the SKM 100 G4 menu, you can configure the following settings.

Adjusting the input sensitivity
▷ See “Sensitivity menu item”

Setting the frequency bank and the channel
▷ See “Frequency Preset menu item”

Entering a freely selectable name
▷ See “Name menu item”

Activating/deactivating the automatic lock-off function
▷ See “Auto Lock menu item”

Configuring enhanced settings in the Advanced Menu:
• Adjusting the transmission frequencies for the U frequency bank
• Defining the MIC button setting (SKM 100 G4-S only)
• Activating/deactivating the pilot tone evaluation
• Adjusting the contrast of the display panel
• Resetting the transmitter
• Displaying the current software revision
▷ See “Advanced menu item”
Sensitivity menu item

- Adjusting the input sensitivity – AF audio level

**“Stored”**

**Setting range:** 0 dB to -48 dB in 6 dB steps.

The AF audio level is also displayed when the wireless microphone is muted, e.g. to check the sensitivity before a live broadcast.

**Recommended presets:**

- Loud music/vocals: -48 to -18 dB
- Moderation: -18 to -12 dB
- Interviews: -12 to 0 dB
Using the SKM 100 G4

Frequency Preset menu item
- Manually selecting a frequency bank and channel

While you work in the Frequency Preset menu, the RF signal is deac-tivated.

Please note when creating multi-channel systems:
Only the factory-preset frequencies within one frequency bank are inter-modulation-free. The wireless microphone and receiver must be set to the same frequency. Be sure to note the information on frequency selection under “Establishing a radio link”.

Name menu item
- Entering names

In the Name menu item you can enter any name you want for the wireless microphone (e.g. the names of the musicians).

The name can be shown in the Frequency/Name and Name/Channel standard displays.

The names are a maximum of 8 characters:
- All letters except umlauts.
- Numbers from 0 to 9
- Special characters and spaces

Enter the names as follows:
- Move the multi-function switch to select a character.
- Press the multi-function switch to jump to the next space or to save the name you have entered once it is complete.
Auto Lock menu item

• Switching the automatic lock-off function on and off

This lock prevents the wireless microphone from being unintentionally switched off and also prevents any unintentional changes to the transmitter’s configuration. In the current standard display, the lock icon shows whether the lock-off function is currently switched on.

You can find information about using the lock-off function under “Lock-off function”.

„Stored“
Advanced menu item

In the Advanced submenu you can configure enhanced settings.

The following sub-items are available:

---

Adjusting the transmission frequencies for the U frequency bank
▷ See “Advanced > Tune menu item”

---

Defining the MIC button setting (SKM 100 G4-S only)
▷ See “Advanced > Mute Mode menu item (SKM 100 G4-S only)”

Resetting the transmitter
▷ See “Advanced > Reset menu item”

---

Displaying the current software revision
▷ See “Advanced > Software Revision menu item”
Advanced > Tune menu item

- Configuring the transmission frequency and frequency bank U

When you have configured the wireless microphone to a system bank and you call up the Tune menu item, channel 1 of the frequency bank U is automatically set. The message U.1 briefly appears in the display. In the factory settings, the channels of the frequency bank U are not assigned to any transmission frequency.

While you work in the Tune menu, the RF signal is deactivated.

You can configure a transmission frequency for the current channel or select a channel in the frequency bank U and configure a transmission frequency for this channel in the Tune menu. Be sure to note the information on frequency selection, see “Setting notes”.

Only adjusting the frequency

To configure the transmission frequency for the current channel:

► Open the Tune menu item in the Advanced menu.

The frequency selection appears.

► Configure the desired frequency.

► Press the multi-function switch.

Your settings will be saved. You are now back in the operating menu.

Setting the channel and frequency

To select a channel and assign it a frequency:

► Move the multi-function switch until the Tune menu item appears.

► Hold down the multi-function switch until the frequency bank selection appears.

► Set the desired channel.

► Press the multi-function switch.

The frequency selection appears.

► Configure the frequency.
Advanced > Mute Mode menu item (SKM 100 G4-S only)

- Configuring the function of the **MIC** button

  **AF On/Off mode**
  - When you press the **MIC** button, no audio signal is transmitted.

  **Disabled mode**
  - No function

You can find information about the **MIC** button under “Muting the handheld transmitter (AF mute)”.

---

Advanced > Pilot Tone menu item

- Activating/deactivating pilot tone transmission

The pilot tone has an inaudible frequency that is sent from the transmitter and evaluated by the receiver. It supports the receiver’s squelch function.

---

Advanced > LCD Contrast menu item

- Adjusting the contrast of the display panel

You can configure the contrast of the display in 16 steps.
Advanced > Reset menu item

- Resetting the wireless microphone

When you reset the wireless microphone, only the selected settings of the pilot tone and the frequency bank are retained.

Advanced > Software Revision menu item

- Show software revision

You can display the current software revision.
Using the SK 100 G4

These sections contain detailed information about using the SK 100 G4. You can find information on installation and startup of the SK 100 G4 under “Installing the SK 100 G4”.
Operating elements of the SK 100 G4 bodypack transmitter

     See “Buttons for navigating the SK 100 G4 menu”

8 Infra-red interface
   - See “Synchronizing devices”

9 **MUTE** switch
   - Deactivate and activate audio signal
     See “Muting the bodypack transmitter (AF mute)”
   - Deactivate and activate RF signal
     See “Deactivating the RF signal (RF mute)”

### Switching the SK 100 G4 bodypack transmitter on and off

▷ Press the two catches and open the battery compartment cover.

To switch on the SK 100 G4:
▷ Hold down the **ON/OFF** button until the Sennheiser logo appears on the display.

To switch off the SK 100 G4:
▷ Hold down the **ON/OFF** button until the display goes off.
Muting the bodypack transmitter (AF mute)

You can deactivate the audio signal with the MUTE switch.

To do this, the MUTE switch function must be configured to **AF On/Off**. You can find more information about this subject under “Advanced > Mute Mode menu item”.

► Slide the MUTE switch to the MUTE position.

The audio signal is muted. The message MUTE is shown on the display.
Deactivating the RF signal (RF mute)

You can deactivate the RF signal in two ways:

Deactivating the RF signal with the MUTE switch

You can deactivate the RF signal with the MUTE switch.
To do this, the MUTE switch function must be configured to RF On/Off. You can find more information about this subject under “Advanced > Mute Mode menu item”.

►
Slide the **MUTE** switch to the **MUTE** position.
The RF signal is deactivated. The message **MUTE** is shown in the display and the transmission icon no longer appears.
Deactivating the RF signal with the ON/OFF button

You can deactivate the RF signal with the ON/OFF button.

To deactivate the RF signal:
▷ Short-press the ON/OFF button.
   RF Mute On? appears.
▷ Press the SET button.
   The RF signal is deactivated. The message MUTE is shown in the display and the transmission icon no longer appears.

To activate the RF signal:
▷ Short-press the ON/OFF button.
   RF Mute Off? appears.
▷ Press the SET button.
   The transmission icon appears again.
**Lock-off function**

You can set the automatic lock-off function in the **Auto lock** menu (see “Buttons for navigating the SK 100 G4 menu”).

When you have switched on the lock-off function, you will have to turn the transmitter off and on again in order to operate it.

To temporarily deactivate the lock-off function:
- Press the **SET** button.
  - **Locked** appears in the display panel.
- Press the **UP** or **DOWN** button.
  - **Unlock?** appears in the display panel.
- Press the **SET** button.
  - Lock-off function is now temporarily deactivated.
Displays on the SK 100 G4 bodypack transmitter display panel

You can view the following information on the transmitter display.

1 AF audio level
   - Displays the audio level with peak hold function
   - See “Sensitivity menu item”

2 Frequency
   - Configured transmission frequency
   - See “Frequency Preset menu item”

3 Name
   - Freely selectable name of the receiver
   - See “Name menu item”

Name menu item

- Entering names

In the Name menu item you can enter any name you want for the bodpack transmitters (e.g. the names of the musicians).

The name can be shown in the Frequency/Name and Name/Channel standard displays.

The names are a maximum of 8 characters:
  - All letters except umlauts.
  - Numbers from 0 to 9
  - Special characters and spaces

Enter the names as follows:
- Press the UP or DOWN buttons to select a character.
- Press the SET button to switch to the next space or to save the name you have entered once it is complete.

Auto Lock menu item

- Switching the automatic lock-off function on and off

This lock prevents the wireless microphone from being unintentionally switched off and also prevents any unintentional changes to the transmitter’s configuration. In the current standard display, the lock icon shows whether the lock-off function is currently switched on.

You can find information about using the lock-off function under “Lock-off function”.
Advanced menu item

In the **Advanced** submenu you can configure enhanced settings.

The following sub-items are available:

---

**Adjusting the transmission frequencies for the U frequency bank**
- See “Advanced > Tune menu item”

---

**Configuring the MUTE switch**
- See “Advanced > Mute Mode menu item”

---

**Configuring the guitar cable emulation**
- See “Advanced > Cable Emulation menu item”

---

**Activating/deactivating the pilot tone evaluation**
- See “Advanced > Pilot Tone menu item”

---

**Adjusting the contrast of the display panel**
- See “Advanced > LCD Contrast menu item”

---

**Resetting the transmitter**
- See “Advanced > Reset menu item”

---

**Displaying the current software revision**
- See “Advanced > Software Revision menu item”
Advanced > Tune menu item

- Configuring the transmission frequency and frequency bank U

When you have configured the bodypack transmitter to a system bank and you call up the Tune menu item, channel 1 of the frequency bank U is automatically set. The message U.1 briefly appears in the display. In the factory settings, the channels of the frequency bank U are not assigned to any transmission frequency.

While you work in the Tune menu, the RF signal is deactivated.

You can configure a transmission frequency for the current channel or select a channel in the frequency bank U and configure a transmission frequency for this channel in the Tune menu. Be sure to note the information on frequency selection, see “Setting notes”.

**Only adjusting the frequency**

To configure the transmission frequency for the current channel:

▷ Open the Tune menu item in the Advanced menu.

The frequency selection appears.

- Configure the desired frequency.
- Press the SET button.

Your settings will be saved. You are now back in the operating menu.

**Setting the channel and frequency**

To select a channel and assign it a frequency:

▷ Open the Tune menu item in the Advanced menu by pressing and holding the SET button until the frequency bank selection appears.

- Set the desired channel.
- Press the SET button.

The frequency selection appears.

- Configure the frequency.
Advanced > Mute Mode menu item

- Configuring the MUTE switch

  • **AF On/Off** mode
    - If set to position MUTE, the audio signal is muted.

  • **RF On/Off** mode
    - If set to position MUTE, the RF signal is deactivated.

  • **Disabled** mode
    - No function

You can find information about operating the mute switch under “Muting the bodypack transmitter (AF mute)” and “Deactivating the RF signal (RF mute)”.

Advanced > Cable Emulation menu item

- Emulating a guitar cable

  Using this menu item you can emulate the capacitances of your guitar cables and influence the sound of your guitar.
Advanced > Pilot Tone menu item
- Activating/deactivating pilot tone transmission

The pilot tone has an inaudible frequency that is sent from the transmitter and evaluated by the receiver. It supports the receiver’s squelch function.

Advanced > LCD Contrast menu item
- Adjusting the contrast of the display panel

You can configure the contrast of the display in 16 steps.

Advanced > Reset menu item
- Resetting the bodypack transmitter

When you reset the bodypack transmitter, only the selected settings of the pilot tone and the U frequency bank are retained.

Advanced > Software Revision menu item
- Show software revision

You can display the current software revision.
Using the SKP 100 G4

These sections contain detailed information about using the SKP 100 G4. You can find information on installation and startup of the SKP 100 G4 under “Installing the SKP 100 G4”.

Sennheiser
Using the SKP 100 G4

Operating elements of the SKP 100 G4 plug-on transmitter

1 Display panel
   • See “Displays on the SKP 100 G4 plug-on transmitter display panel”

2 UP button
   • See “Buttons for navigating the SKP 100 G4 menu”

3 Operation and battery indicator, red LED
   • illuminated = ON
     See “Switching the SKP 100 G4 plug-on transmitter on and off”
   • flashing = LOW BATTERY
     See “Inserting and removing the batteries/rechargeable batteries”

4 ON/OFF button with ESC function in the operating menu
   • Switch the transmitter on or off
     See “Switching the SKP 100 G4 plug-on transmitter on and off”
   • Escape function in the menu
     See “Buttons for navigating the SKP 100 G4 menu”

5 DOWN button
   • See “Buttons for navigating the SKP 100 G4 menu”

6 MUTE switch
   • See “Muting the plug-on transmitter (AF mute)”

7 SET button
   • See “Buttons for navigating the SKP 100 G4 menu”

8 Infra-red interface
   • See “Synchronizing devices”
Switching the SKP 100 G4 plug-on transmitter on and off

To switch on the SKP 100 G4:
▷ Hold down the ON/OFF button until the Sennheiser logo appears on the display.

To switch off the SKP 100 G4:
▷ Hold down the ON/OFF button until the display goes off.
Muting the plug-on transmitter (AF mute)

You can mute the audio signal with the MUTE switch.

To do this, the MUTE switch function must be configured to AF On/Off. You can find more information about this subject under “Advanced > Mute Mode menu item”.

▷ Slide the MUTE switch to the MUTE position.

The audio signal is muted. The message MUTE is shown on the display.
Deactivating the RF signal (RF mute)

You can deactivate the RF signal in two ways:

Deactivating the RF signal with the MUTE switch

You can deactivate the RF signal with the MUTE switch.

To do this, the MUTE switch function must be configured to RF On/Off. You can find more information about this subject under “Advanced > Mute Mode menu item”.

Slide the MUTE switch to the MUTE position.
The RF signal is deactivated. The message **MUTE** is shown in the display and the transmission icon no longer appears.

---

**Deactivating the RF signal with the ON/OFF button**

You can deactivate the RF signal with the ON/OFF button.

To deactivate the RF signal:
- Short-press the **ON/OFF** button.
  
  RF Mute On? appears.
- Press the **SET** button.

  The RF signal is deactivated. The message **MUTE** is shown in the display and the transmission icon no longer appears.

---

To activate the RF signal:
- Short-press the **ON/OFF** button.
  
  RF Mute Off? appears.
- Press the **SET** button.

  The transmission icon appears again.
Lock-off function

You can set the automatic lock-off function in the Auto lock menu (see “Auto Lock menu item”).

When you have switched on the lock-off function, you will have to turn the transmitter off and on again in order to operate it.

To temporarily deactivate the lock-off function:

▷ Press the SET button.
  Locked appears in the display panel.
▷ Press the UP or DOWN button.
  Unlock? appears in the display panel.
▷ Press the SET button.
  Lock-off function is now temporarily deactivated.

When you are in the operating menu

>> Lock-off function is deactivated long enough for you to work in the operating menu.

When one of the standard displays is shown

>> Lock-off function is automatically activated after 10 seconds.

The lock-off function icon flashes while the lock-off function is being activated again.
Displays on the SKP 100 G4 plug-on transmitter display panel

You can view the following information on the transmitter display.

1. **AF audio level**
   - Displays the audio level with peak hold function
   - See “Sensitivity menu item”

2. **Frequency**
   - Configured transmission frequency
   - See “Frequency Preset menu item”

3. **Name**
   - Freely selectable name of the receiver
   - See “Name menu item”

4. **Transmission icon**
   - RF signal is being transmitted
   - See “Deactivating the RF signal (RF mute)”

5. **Lock-off function**
   - Lock-off function is activated
   - See “Auto Lock menu item”

6. **Battery status**
   - See “Inserting and removing the batteries/rechargeable batteries”

7. **MUTE muting function**
   - The audio signal is muted
   - See “Muting the plug-on transmitter (AF mute)”

8. **P pilot tone**
   - Pilot tone transmission is activated
   - See “Advanced > Pilot Tone menu item”
Select a standard display

Press the UP or DOWN buttons to select a standard display.

**Frequency/Name standard display**

![Frequency/Name standard display]

**Channel/Frequency standard display**

![Channel/Frequency standard display]

**Name/Channel standard display**

![Name/Channel standard display]
Buttons for navigating the SKP 100 G4 menu

Navigating through the menu

To open the menu:
▷ Press the SET button.
   The operating menu is shown on the transmitter display panel.

To open a menu item:
▷ Press the UP or DOWN buttons to navigate through the individual menu items.
▷ Press the SET button to open the selected menu item.

“Operating elements of the SKP 100 G4 plug-on transmitter”

Making changes in a menu item

After you open a menu item, you can make changes as follows:
▷ Press the UP or DOWN buttons to set the displayed value.
▷ Press the SET button to save the setting.
▷ Press the ESC (ON/OFF) button to leave the menu item without saving the setting.

“Operating elements of the SKP 100 G4 plug-on transmitter”

>> “Displays on the SKP 100 G4 plug-on transmitter display panel”
>> “Setting options in the menu”
Setting options in the menu
In the SKP 100 G4 menu, you can configure the following settings.

---

**Adjusting the input sensitivity**
▷ See “Sensitivity menu item”

---

**Setting the frequency bank and the channel**
▷ See “Frequency Preset menu item”

---

**Entering a freely selectable name**
▷ See “Name menu item”

---

**Activating/deactivating the automatic lock-off function**
▷ See “Auto Lock menu item”

---

**Configuring enhanced settings in the Advanced Menu:**
- Adjusting the transmission frequencies for the U frequency bank
- Configuring the MUTE switch
- Configuring the guitar cable emulation
- Activating/deactivating the pilot tone evaluation
- Adjusting the contrast of the display panel
- Resetting the transmitter
- Displaying the current software revision
▷ See “Advanced menu item”
Sensitivity menu item

- Adjusting the input sensitivity – **AF** audio level

```
Menu
Sensitivity
-12 dB
```

**“Stored”**

**Setting range:** 0 dB to -48 dB in 6 dB steps.

The **AF** audio level is also displayed when the plug-on transmitter is muted, e.g. to check the sensitivity before a live broadcast.

---

Frequency Preset menu item

- Manually selecting a frequency bank and channel

```
Menu
Frequency Preset
B.Ch: 1.1
```

**“Stored”**

- **i** While you work in the Frequency Preset menu, the RF signal is deactivated.

**Please note when creating multi-channel systems:**

Only the factory-preset frequencies within one frequency bank are intermodulation-free. The bodypack transmitter and receiver must be set to the same frequency. Be sure to note the information on frequency selection under “Establishing a radio link”.
Name menu item

- Entering names

In the Name menu item you can enter any name you want for the bodypack transmitters (e.g. the names of the musicians).

The name can be shown in the Frequency/Name and Name/Channel standard displays.

The names are a maximum of 8 characters:

- All letters except umlauts.
- Numbers from 0 to 9
- Special characters and spaces

Enter the names as follows:

▷ Press the UP or DOWN buttons to select a character.
▷ Press the SET button to switch to the next space or to save the name you have entered once it is complete.

Auto Lock menu item

- Switching the automatic lock-off function on and off

This lock prevents the wireless microphone from being unintentionally switched off and also prevents any unintentional changes to the transmitter’s configuration. In the current standard display, the lock icon shows whether the lock-off function is currently switched on.

You can find information about using the lock-off function under “Lock-off function”.

Using the SKP 100 G4
Advanced menu item
In the **Advanced** submenu you can configure enhanced settings.

The following sub-items are available:

---

**Adjusting the transmission frequencies for the U frequency bank**
▷ See “Advanced > Tune menu item”

---

**Configuring the MUTE switch**
▷ See “Advanced > Mute Mode menu item”

---

**Activating/deactivating the pilot tone evaluation**
▷ See “Advanced > Pilot Tone menu item”

---

**Adjusting the contrast of the display panel**
▷ See “Advanced > LCD Contrast menu item”

---

**Resetting the transmitter**
▷ See “Advanced > Reset menu item”

---

**Displaying the current software revision**
▷ See “Advanced > Software Revision menu item”
Advanced > Tune menu item

- Configuring the transmission frequency and frequency bank U

When you have configured the bodypack transmitter to a system bank and you call up the Tune menu item, channel 1 of the frequency bank U is automatically set. The message U.1 briefly appears in the display. In the factory settings, the channels of the frequency bank U are not assigned to any transmission frequency.

While you work in the Tune menu, the RF signal is deactivated.

You can configure a transmission frequency for the current channel or select a channel in the frequency bank U and configure a transmission frequency for this channel in the Tune menu. Be sure to note the information on frequency selection, see “Setting notes”.

Only adjusting the frequency

To configure the transmission frequency for the current channel:

▷ Open the Tune menu item in the Advanced menu.

The frequency selection appears.

▶ Configure the desired frequency.

▷ Press the SET button.

Your settings will be saved. You are now back in the operating menu.

Setting the channel and frequency

To select a channel and assign it a frequency:

▷ Open the Tune menu item in the Advanced menu by pressing and holding the SET button until the frequency bank selection appears.

▶ Set the desired channel.

▷ Press the SET button.

The frequency selection appears.

▶ Configure the frequency.
Advanced > Mute Mode menu item

- Configuring the MUTE switch

**AF On/Off mode**
- If set to position MUTE, the audio signal is muted.

**RF On/Off mode**
- If set to position MUTE, the RF signal is deactivated.

**Disabled mode**
- No function

You can find information about operating the mute switch under “Muting the plug-on transmitter (AF mute)” and “Deactivating the RF signal (RF mute)”.

Advanced > Pilot Tone menu item

- Activating/deactivating pilot tone transmission

The pilot tone has an inaudible frequency that is sent from the transmitter and evaluated by the receiver. It supports the receiver’s squelch function.

Advanced > LCD Contrast menu item

- Adjusting the contrast of the display panel

You can configure the contrast of the display in 16 steps.
Advanced > Reset menu item
- Resetting the plug-on transmitter

When you reset the plug-on transmitter, only the selected settings of the pilot tone and the U frequency bank are retained.

Advanced > Software Revision menu item
- Show software revision

You can display the current software revision.
Establishing a radio link

To establish a radio link between the transmitter and receiver, the same frequency must be set in both devices.

You can do this in a number of different ways:

1. Use the **Easy Setup** function to perform an **automatic frequency setup** (see “Easy Setup menu item”).

2. Set a frequency in the receiver **manually** (see “Frequency Preset menu item”) and **synchronize** it with the transmitter (see “Synchronizing devices”).

3. Set the frequency on the receiver and the transmitter **manually** (EK 100 G4: “Frequency Preset menu item”, SKM 100 G4: “Frequency Preset menu item”, SK 100 G4: “Frequency Preset menu item”, SKP 100 G4: “Frequency Preset menu item”)

**Setting notes**

Please note the following when synchronizing a transmitter with a receivers:

- Only use transmitters and receivers from the same frequency range (see the type plate on the transmitter and receiver).
- Make sure that your chosen frequencies are listed in the frequency table for the particular frequency range (see “Frequency tables”).
- Ensure that the desired frequencies are permitted in your country and apply for an operating license if necessary.

---

**Please note the information at the following address:**

General conditions and restrictions for the use of frequencies
Synchronizing devices

You can synchronize ew 100 P G4 series transmitters and receivers via the receiver’s infrared interface.

To synchronize the devices:
▷ Switch the transmitter and the receiver on.
▷ Call up the Sync menu item on the receiver.
   Sync appears in the receiver’s display.
▷ Hold the infra-red interface of the transmitter in front of the infra-red interface of the receiver.
   The parameters are transferred to the transmitter. When the transfer is complete, a tick appears in the receiver’s display as a confirmation. Then the receiver will return to the current standard display.

To cancel synchronization:
▷ Press the ON/OFF button on the receiver.
   An X appears in the display.
   This icon also appears when:
   • no transmitter is found or the transmitter is not compatible.
   • no transmitter is found and the synchronization process automatically ends after 30 seconds.
SPECIFICATIONS

Overview

In the sections below, you can find information about the different variants of the products in the **ew 100 P G4** series as well as technical data for the individual products.

- Product variants and frequency variants >> “Product variants”
- Frequency tables with overviews of all banks and channels >> “Frequency tables”
- Product-specific technical data >> “Specifications”
- Information on pin assignment (jack and XLR) >> “Pin assignment”

You can also find information about safely cleaning and maintaining **evolution wireless G4** series products as well as help in the event of malfunctions.

Frequency tables

You can find frequency tables for all available frequency ranges in the download section of the Sennheiser website under www.sennheiser.com/download.

Download area of the Sennheiser website

Enter ew G4 into the search bar to show the frequency tables.
Specifications

You can find the cross-system and product-specific technical data in the sections below.
# EK 100 G4

## RF characteristics

<table>
<thead>
<tr>
<th>Modulation</th>
<th>Wideband FM</th>
</tr>
</thead>
</table>
| Receiving frequency ranges | A1: 470 – 516 MHz  
A: 476 – 558 MHz  
AS: 520 – 558 MHz  
G: 566 – 608 MHz  
GB: 606 – 648 MHz  
B: 626 – 668 MHz  
C: 734 – 776 MHz  
D: 780 – 822 MHz  
TH: 794 – 806 MHz  
E: 823 – 865 MHz  
JB: 806 – 810 MHz  
K+: 925 – 937.5 MHz |
| Receiving frequencies | Max 1680 receiving frequencies, adjustable in 25 kHz steps  
20 frequency banks, each with up to 12 factory-preset channels, no intermodulation  
1 frequency bank with up to 12 programmable channels |
| Switching bandwidth  | up to 42 MHz                  |
| Nominal/peak deviation | ±24 kHz / ±48 kHz           |
| Receiver principle   | Adaptive diversity           |
| Sensitivity (with HDX, peak deviation) | < 1.6 μV for 52 dBA <sub>eff S/N</sub> |
| Adjacent channel selection | ≥ 65 dB                      |
| Intermodulation attenuation | ≥ 65 dB                      |
| Blocking             | ≥ 70 dB                       |
| Squelch              | Low: 5 dBμV  
Middle: 15 dBμV  
High: 25 dBμV        |
| Pilot tone squelch   | Can be switched off           |

Pin assignment

3.5 mm stereo jack plug

- Plug for headphone and earphone cables, e.g. IE 4.
- Connect to:
  - EK IEM G4
  - EK 500 G4

3.5 mm mic jack plug

- Plug for lavalier and headset microphone, e.g. ME 2.
- Connect to:
  - SK 100 G4
  - SK 300 G4
  - SK 500 G4

3.5 mm line jack plug

- Plug for line and instrument cables, e.g. Ci 1-N
- Connect to:
  - SK 100 G4
  - SK 300 G4
  - SK 500 G4

6.3 mm stereo jack plug, balanced (audio in/loop out)

- Connect to:
  - SR IEM G4 Audio In
  - SR IEM G4 Loop Out
**Pin assignment**

6.3 mm mono jack plug, unbalanced

- Connect to:
  - EM 100 G4 Audio Out
  - EM 300-500 G4 Audio Out

6.3 mm stereo jack plug for headphone jack

- Connect to:
  - EM 100 G4 headphone input
  - EM 300-500 G4 headphone input
  - SR IEM G4 headphone input

XLR-3 plug, balanced

Hollow jack plug for power supply
Cleaning and maintenance

Note the following information when cleaning and maintaining evolution wireless G4 series products.

**CAUTION**

**Liquids can damage the products’ electronics.**

Liquids entering the product housing can cause a short-circuit and damage the electronics.

▷ Keep all liquids away from the products.

▷ Do not use any solvents or cleansing agents.

▷ Disconnect the products from the power supply system and remove rechargeable batteries and batteries before you begin cleaning.

▷ Clean all products only with a soft, dry cloth.

▷ Note the special cleaning instructions below for the following products.

**Cleaning the sound inlet basket of the microphone module**

▷ Unscrew the top sound inlet basket from the microphone module by turning it counterclockwise.

▷ Remove the foam insert.

You can clean the sound inlet basket in two ways:

▷ Use a slightly damp cloth to clean the top sound inlet basket from the inside and outside.

▷ Use a brush and rinse with clean water.

▷ If necessary, clean the foam insert with a mild detergent or replace the foam insert.

▷ Dry the top sound inlet basket and foam insert.

▷ Reinsert the foam insert.
Cleaning and maintenance

▷ Screw the sound inlet basket back onto the microphone module.
From time to time, you should also clean the microphone module contacts:
▷ Wipe the contacts of the microphone module with a soft, dry cloth.
