

Updating the firmware of Dante™ compatible Sennheiser products

The firmware update of the Dante™ interface of your Sennheiser product requires Audinate's Firmware Update Manager software:

www.audinate.com/products/firmware-update-manager

The latest Dante™ firmware update for your Dante™ compatible Sennheiser product can be found in the download section of the Sennheiser website at:

www.sennheiser.com/download

To update the Dante™ firmware:

- ▷ Download and install Audinate's Firmware Update Manager on your computer.
- ▷ Connect your Dante™ compatible Sennheiser product to your computer.
- ▷ Download the latest Dante™ firmware for your Sennheiser product from the Sennheiser website and save it on your computer.
- ▷ Open the Firmware Update Manager.
- ▷ Start the firmware update process.
The software will guide you through the process step by step.
