

DIGITIZATION OF AV MANAGEMENT WORKFLOWS:

Sennheiser Control Cockpit 3.0.0 update will be available from mid-February

Wedemark/Amsterdam, 5 February 2019 – At ISE, Sennheiser has announced an update for its Sennheiser Control Cockpit software for the remote control, monitoring and maintenance of wireless microphone systems deployed in campus-style installations. The new version 3.0.0 will be available from mid-February and expands the functionality of the software to support the upcoming TeamConnect Ceiling 2 ceiling microphone. In addition, the software will now also support ew G3 and G4 IEM transmitters and provide additional settings for G3 and G4 microphone receivers along with improvements in usability.

Sennheiser will launch an update to its free AV management software "Sennheiser Control Cockpit" in mid-February

As a universal tool for education and business environments, Sennheiser Control Cockpit has been designed to make the daily routines and workflows associated with the use of wireless microphones in corporate and campus settings far easier.

Battery management is a breeze for the IT manager – either they can filter for low batteries or activate push messages to their (mobile) devices. The software also helps in the identification of potential issues that an end user may encounter, enabling IT staff to remotely check the operating status of each microphone on the campus or in a company.

Sennheiser Control Cockpit provides easy remote management of microphones in campus-like installations

The Sennheiser Control Cockpit 3.0.0 software will be available for free download at [sennheiser.com/control-cockpit-software](https://www.sennheiser.com/control-cockpit-software) from 15 February.

Visit Sennheiser at ISE 2019 to learn more about Sennheiser Control Cockpit in Hall 2, B-50.

About Sennheiser

Shaping the future of audio and creating unique sound experiences for customers – this aim unites Sennheiser employees and partners worldwide. Founded in 1945, Sennheiser is one of the world's leading manufacturers of headphones, microphones and wireless transmission systems. With 21 sales subsidiaries and long-established trading partners, the company is active in more than 50 countries and operates its own production facilities in Germany, Ireland, Romania and the USA. Since 2013, Sennheiser has been managed by Daniel Sennheiser and Dr. Andreas Sennheiser, the third generation of the family to run the company. In 2017, the Sennheiser Group generated turnover totaling €667.7 million. www.sennheiser.com
