

Firmware version 1.26

Sennheiser recommends to always install the latest firmware version to ensure the best performance of your product.

We have implemented the following:

- Improved and more accurate display of battery charge status.
- Improved Bluetooth connection process.
- Earphones can also be switched off using the Smart Control app.
- Transparent Hearing remains active after a phone call.
- Improved audio quality when making phone calls.
- Improved and stabilized software and user-friendliness.

Installing the Smart Control app:

Download the app from the App Store or Google Play and install it on your smartphone. Alternatively, you can use your smartphone to scan the following QR code or to call up the following Internet site: www.sennheiser.com/smartcontrol.

Smart Control

Performing the firmware update:

1. Install the Sennheiser Smart Control app.
2. Connect your MOMENTUM True Wireless to the Smart Control app.

If your MOMENTUM True Wireless is connected to the Sennheiser Smart Control app and an update is available, you will be offered the update via the app. The current firmware release status is displayed under Device Settings in the app.
