The Pursuit of Perfect Sound

Pure, uncompromising sound ...

If you don't compromise in life, then why should you compromise on sound? Sennheiser's MOMENTUM is the perfect musical companion to a mobile, urban lifestyle, because it is as clear and striking as its wearer. Perhaps that's not so surprising, since we were able to leverage on 65 years of audio experience when we developed these unique headphones – and incorporate countless pioneering innovations, such as the dynamic one-way transducer.

The result is a distinctive combination of the finest workmanship, exceptional materials, such as high-quality, supple leather and elegant stainless steel, modern high-end technology, and perfect construction down to the finest detail. The MOMENTUM makes every note and every beat an unforgettable experience – whether at home, on the street, or during your daily commute.

... for urban, mobile life.

Moving through fashionable parts of town? Taking the bus to work? Sitting in an airport lounge? The MOMENTUM is always the perfect accessory for demanding urbanistas. It unites Sennheiser's pure, precise sound with a pure, minimalist design. Its exquisitely modest form and smooth metal of the headband are reminiscent of the simple elegance in modern architecture. The supremely soft, supple leather

of the ear cups gives the headphones a luxurious look while making them exceptionally comfortable to wear. Its high-performance transducer system, which incorporates neodymium magnets, guarantees a detailed, full-bodied stereo sound. In addition, fully enclosed ear cups screen out the noise of the city. Enjoy the incomparable sound that MOMENTUM provides – sound that will suit your lifestyle.

The MOMENTUM is available in black and brown.

Features

- Finest materials offer absolute listening comfort matched with a luxurious look and feel.
- Metal construction of headband underlines the premium quality and minimalistic styling.
- To ensure that the headphones are ready for use at any time, they have been optimized for connection to an iPad, iPhone, or iPod*.
- A cable equipped with an integrated smart remote and microphone is included. This can be used not only to regulate volume and select tracks, but also to take phone calls and activate the voice control feature.

* iPhone, iPod and iPad are trademarks of Apple Inc., registered in the US and other countries.

Stainless steel. We chose high-precision stainless steel for the headband construction of the MOMENTUM with good reason. This high-grade, robust material underscores the headphones' modern, minimalist design. It is also extremely strong and corrosion-resistant, and doesn't get stained by water. These properties make it highly resistant to different environments. Therefore the MOMENTUM is built to last.

Breathable leather. Breathable leather has been used on the MOMENTUM's headband to ensure the best possible levels of comfort and grip. Originally used for manufacturing protective clothing, it is prepared using a special tanning process, making it extraordinarily rugged and tear-resistant, as well as slow to wear out. This premium-quality material is also comfortable, air-permeable, and water-repellant – even against rain and sweat.

Soft, supple leather. The soft, supple leather used on the ear cups makes the MOMENTUM supremely comfortable to wear and bestows a touch of luxury. It is extremely easy to look after and simple to clean – aside from being very lightweight, tough, long-lasting and naturally elastic. Their other benefits include better grip on contact surface, which means the MOMENTUM sits firmly and snugly in position when you move around.
